
Quadrangles 2017 source code Documentation

Release 1.0

FRC Team 3494 (The Quadrangles)

January 11, 2017

1	Contributing	1
1.1	Previewing your changes	1
1.2	Creating Subsystem docs	1
2	Indices and tables	3

Contributing

All documentation changes **must** be done on the branch `feature/documentation`, under penalty of commit reversion.

1.1 Previewing your changes

You should do this *before* you commit.

1. `cd docs`
2. OS-Dependent:
 - On Windows: `.\make html`
 - On Linux: `make html`
3. Open `_build/html/filename.html` in your browser of choice. (If that's IE, rethink your life choices.)

1.2 Creating Subsystem docs

1. Copy `_templates/subsystem.rst` into `docs/name_of_sub_system.rst`
2. Fill out the file
3. Add, commit, and push. Read The Docs should automatically build the new HTML pages for you.

Indices and tables

- `genindex`
- `modindex`
- `search`
