ansible-eos Documentation

Release 1.3.0

Arista EOS+

December 13, 2016

The ansible-eos project provides modules for managing resources on Arista EOS nodes. Please see Ansible Galaxy for more details This project is maintained by the Arista Networks EOS+ Consulting Services organization.

> **Warning: Deprecation Notice**
>
> Ansible 2.1 ships with great new networking modules purpose-built for Arista EOS. Due to the easy-to-use nature of these modules, and their great flexibility, it is no longer recommended to use the arista.eos role.
