bonobo-trans provides a set of ETL transformations for the Bonobo ETL toolkit.

- source/source
- source/target
- source/lookup
- source/sequencer
- source/sorter
- source/aggregator

CHAPTER 1

Requirements

- bonobo 0.6.3
- pandas
- sqlalchemy

CHAPTER 2

Installation

Install bonobo-trans by running:

```
$ pip install bonobo-trans
```

CHAPTER 3

Contribute

- We need a code review!
- ReadTheDocs TOC is missing structure (and I seem to be unable to figure this out).

CHAPTER 4

Support

If you are having issues, please let me know. I can be reached via Slack's Direct Messaging on bonobo-etl.slack.com

CHAPTER 5

License

The project is licensed under the Apache license.
