CHAPTER 1

bumper-lib

A library to bump / pin your dependency requirements. This is used by the [bumper](#) and [workspace-tools](#) package.

CHAPTER 2

More

3.1 Bumper Driver

3.2 Bumper Cars

3.3 Bumper Utils

4.1 Version 2.0.4

- Test against py27 and build universal wheel

4.1.1 Version 2.0.3

- Update setup files

4.1.2 Version 2.0.2

- Update author email

4.1.3 Version 2.0.1

- Decode changelog to utf-8
- Fix tox.ini

4.1.4 Version 2.0.0

- Code cleanup and switch to Python 3 only
 1. Switch to use new tox.ini template (Python 3 only)
 2. Move sources to top level without src
 3. Change indent from 2 to 4 spaces.
- Add Python 3 classifier

4.2 Version 0.2.17

- Python 3 compatible & tests
- Use print()
- Remove use of --download-cache option

4.2.1 Version 0.2.16

- Print warning for single bump failure when no requirements are provided

4.2.2 Version 0.2.15

- Support recursive requirements and ignore other meta flags

4.2.3 Version 0.2.14

- Treat bad requirements as comment so bumping will work
- Better debug log message when failing to get changelog

4.2.4 Version 0.2.13

- Optimize changelog search using github REST endpoint

4.2.5 Version 0.2.12

- Remove transitive dependency parsing with Bump/Require/Pin commit words

4.2.6 Version 0.2.11

- Check bumps to see if they satisfy any requirements so we do not try to bump again

4.2.7 Version 0.2.10

- Return bumps made for BumperDriver.bump()

4.2.8 Version 0.2.9

- Only check existing requirement for one that will be attempted to be bumped

4.2.9 Version 0.2.8

- Only bump once per package and check requirements after all bumps are done to ensure all requirements are met

4.2.10 Version 0.2.7

- Fix bump for package name / no version
- Fix bumping to specific version

4.2.11 Version 0.2.6

- Add `should_add` to check if a product name should be added to the bumper target

4.2.12 Version 0.2.5

- Return empty changes list instead of None

4.2.13 Version 0.2.4

- Replace existing requirement instead of merging to ensure the proper bump requirement is updated

4.2.14 Version 0.2.3

- Move downgrade changes logic to abstract bumper

4.2.15 Version 0.2.2

- Only reword first/one word when showing bump summary

4.2.16 Version 0.2.1

- Skip requirements parsing for changes when downgrading

4.2.17 Version 0.2.0

- Fully abstract bumper logic

4.3 Version 0.1.5

- Fix dependency looping bug

4.3.1 Version 0.1.4

- Better merged message formatting
- Rename `-detail` to `-verbose`

4.3.2 Version 0.1.3

- Add option to include changelog details for requirements bumper
- Add long description / url

4.3.3 Version 0.1.2

- Fix new requirement addition and add a tip

4.3.4 Version 0.1.0

- Initial release

CHAPTER 5

Indices and tables

- `genindex`
- `modindex`
- `search`
