This documentation gives you instruction how to install and setup CM Coupon Listing on your Joomla! website.

Overview

CM Coupon Listing is a Joomla! component which gives you ability to setup a coupon listing website, where merchants or customers can register and submit discount offers like coupon code, coupon image, discount activation link, affiliate link; this helps the merchants promote their trademarks, promote their services and earn more sales, this also helps customers purchase for their favorite products and services with discount prices.

1.1 License

CM Coupon Listing is released under [GNU Public License version 2 or later](#).

1.2 Technical Requirements

- Joomla! 3.x.x: The latest stable release of Joomla! is always recommended for stability and security. Please check [Joomla!'s Technical Requirements](#) for more information.
- Joomla! 2.5.x: CM Coupon Listing could run on Joomla! 2.5.x. However we don't test all of CM Coupon Listing features on Joomla! 2.5.x because Joomla! 2.5 is not supported by Joomla! any more. Please update to Joomla! 3 if possible.
- Bootstrap 2 or Bootstrap 3: Your site needs to have Bootstrap 2 or 3. If you don't use Bootstrap, you may need to override the output of CM Coupon Listing to add your own CSS classes.

1.3 Additional extensions

- CMCouponListing Category List module: a module listing all categories.
- CMCouponListing Featured Merchants module: a module showing random featured merchants.
- CMCouponListing Search module: a module showing a search form.
- cmcouponlistingmerchant plug-in: a plug-in for integration with [Akeeba Subscription](#) component, a merchant is automatically created in CMCouponListing when he/she subscribes a subscription in Akeeba Subscription component. Merchant is inactive when subscription expires.
- tagcmcouponlising plug-in: a tag plug-in for [ACYMailing](#), this helps you insert many coupons from a specific category into ACYMailing's newsletter automatically.
- CMCouponListing Merchant's Coupons: a plug-in to insert list of coupons from a specific merchant into Joomla! article, Custome HTML module or any extension which supports onContentPrepare event.

1.4 Main features

Front-end:

- Support Bootstrap 2 and Bootstrap 3.
- Menu item for listing all coupons, coupons in specific categories.
- Menu item for listing all categories and merchants in them.
- Menu item for listing all merchants.
- Menu item for search page.
- Coupons from featured merchants or featured coupons can be displayed on the top of coupon list.
- Merchant's management area, where merchant edits profile and manages coupons.
- Integrate with Akeeba Subscription, only active merchant can access management area, when merchant's subscription expires his/her account is deactivated so he/she can't access this area any more, unless he/she extends the subscription in Akeeba Subscription.
- Merchant can upload his/her own logo image.
- Merchant can create, edit and delete his/her own coupons.
- Registration form for user to sign up as a merchant.
- Facebook, Twitter and Google+ sharing for coupon and merchant.
- Coupon detail page.
- Support Joomla!'s access control. Coupon can be configured to available to a specific user group, this give you ability to deliver special coupons to special users, for example, users who pay for monthly fee to have access to special offers.
- Merchant registration settings inherit from Users component's settings.
- Merchant logo upload settings inherit from Media component's settings.
- User feedback for working coupon and not working coupon.
- Ask user for how much user saves (for example \$50, 10€) and what user purchases if coupon works.
- Ask user for the reason why coupon doesn't work.
- User can post comment for coupon.
- Print coupon or download coupon image (for printable coupon only).

Back-end:

- Manage category, merchant, coupon.
- Manage where coupon images and logo images are stored.
- Enable or disable Facebook, Twitter and Google+ buttons.
- Enable or disable coupon detail page.
- Control where users can get offers, in coupon listing page or in coupon detail page.
- Manage users's votes.
- Manage users's comments.
- Ability to setup custom reasons for not working coupons.
- Ability to setup currencies for asking how much user saves.

Install & Upgrade

Install CM Coupon Listing is very easy, just like installing any other Joomla! extension.

We strongly recommend to backup your site before installing any new extension on your site.

Log into your Joomla! back-end. On the top menu, you navigate to Extensions -> Manage to access Extension Manager. Click “Browse” button and select the package of CM Coupon Listing that you downloaded from our website, click “Upload & Install” button to upload the package to your server to install.

If the installation is successful, you will receive the message “Installing package was successful.”

To upgrade CM Coupon Listing, you just need to install the package of the new version. Please note that when you upgrade, all the files of CM Coupon Listing will be overwritten, so if you have customized CM Coupon Listing’s source code, your customizations will be lost.

Configuration

After you install CM Coupon Listing, you need to configure it first. In CM Coupon Listing's Dashboard, you click Options button on the toolbar, you are taken to Config component where you can configure many options in CM Coupon Listing.

We have 9 tabs: General, Coupon types, Layout, Vote & comment, Submission page, Sharing buttons, Pagination, Access and Permissions.

3.1 General

The screenshot shows the Joomla! administration interface for the CM Coupon Listing component. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays 'CM Coupon Listing Configuration' and the Joomla! logo. Below the header, there are buttons for 'Save', 'Save & Close', 'Cancel', and 'Help'. The left sidebar lists various system components, with 'CM Coupon Listing' selected. The main content area shows the 'General settings' tab, which includes the following configuration options:

- Logo folder:** A text input field containing 'merchantlogo'.
- Coupon folder:** A text input field containing 'merchantcoupon'.
- Notify admin for new merchant:** A radio button selection with 'Enabled' and 'Disabled' options. 'Disabled' is selected.
- Date format:** A radio button selection with four date format options: '2014-07-31', '31-07-2014', '2014/07/31', and '31/07/2014'. '31/07/2014' is selected.
- Notify admin for new submitted coupon:** A radio button selection with 'Enabled' and 'Disabled' options. 'Disabled' is selected.
- Auto activate merchant:** A radio button selection with 'Enabled' and 'Disabled' options. 'Enabled' is selected.

- **Logo folder:** The folder where logos of merchants are stored.
- **Coupon folder:** The folder where coupons of merchants are stored.

- **Notify admin for new merchant:** Enable or disable mailing to administrators when a new merchant registers. All administrators will receive this notification mail.
- **Date format:** The date format used which is used in merchant and user's submission forms.
- **Notify admin for new coupon:** Send notification mail to administrators when there is a new coupon submitted in front-end by merchant or user.
- **Auto activate merchant:** Auto activate merchant after merchant registers.

Logo and coupon folders are inside your Joomla!'s image folder. You can configure your Joomla!'s image folder in Media Manager.

The email's templates are stored in the language file of the component, to customize the templates you can modify the language file.

3.2 Coupon types

The screenshot shows the Joomla! administration interface for the 'CM Coupon Listing Configuration' component. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The component title 'CM Coupon Listing Configuration' is displayed, along with the Joomla! logo. Below the title are buttons for 'Save', 'Save & Close', 'Cancel', and 'Help'. The left sidebar lists various system components like Global Configuration, AcyMailing, Akeeba, Subscriptions, Banners, and Cache Manager. The main content area is titled 'Coupon types' and contains a description: 'Coupon types that you support on your site. Only selected coupon types are displayed in front-end for users to choose.' Below this, there is a section for 'Supported coupon types' with four checkboxes, all of which are checked: 'Coupon code', 'Printable coupon', 'Activation link', and 'Sale link'.

- **Supported coupon types:** Coupon types that you support on your site. Only selected coupon types are displayed in front-end for users to choose.

3.3 Layout

The screenshot shows the Joomla! administration interface for the CM Coupon Listing Configuration. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays 'CM Coupon Listing Configuration' and the Joomla! logo. Below the header, there are buttons for 'Save', 'Save & Close', and 'Cancel', along with a 'Help' button. The left sidebar lists various system components, with 'CM Coupon Listing' selected. The main content area is divided into tabs: General, Coupon types, Layout (active), Vote & comment, Submission page, Sharing buttons, Pagination, and Access. Under the 'Layout' tab, there are several settings: 'Layout settings' (Bootstrap version set to 'Bootstrap 2'), 'Coupon display order' (set to 'Most recent coupons first'), 'Enable coupon detail page' (radio buttons for 'Enabled' and 'Disabled', with 'Disabled' selected), 'Display get coupon button in coupon list' (radio buttons for 'Display' and 'Hide', with 'Display' selected), 'Category list's column quantity' (radio buttons for '2', '3' (selected), and '4'), and 'Sub-category's left indent' (an empty text input field).

- **Layout:** Select the Bootstrap version that your site uses.
- **Coupon display order:** The order of coupons in coupon list.
- **Enable coupon detail page:** Detail page shows more info about coupon. Enabling coupon detail page also gives user ability to share coupon via social networks. Coupon's detail description is disabled if coupon detail page is disabled.
- **Display get coupon button in coupon list:** If you disable coupon detail page, you should display get coupon button in coupon list so that users can get coupon. If you enable coupon detail page, you can hide the button in coupon list, users need to view detail page to get coupon.
- **Category list's column quantity:** Category list page displays categories and merchants in those categories, the list is displayed as columns.
- **Sub-category's left indent:** Children categories are displayed right below their parent category, you can use spaces or symbols to separate these categories from the left margins, let's us easily recognize that they are children category. This setting is used in both back-end and front-end. You can use HTML entity name, eg for a space or → for a right arrow.

3.4 Vote & comment

The screenshot shows the Joomla! administration interface for the 'CM Coupon Listing' component. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays 'CM Coupon Listing Configuration' and the Joomla! logo. Below the header, there are buttons for 'Save', 'Save & Close', 'Cancel', and 'Help'. The left sidebar lists various system components, with 'CM Coupon Listing' highlighted. The main content area is titled 'Settings for voting and comment.' and contains the following settings:

Setting	Value
Vote	☒ Enabled ☐ Disabled
Who can vote	Public
Ask questions	☒ Enabled ☐ Disabled
Comment	☒ Enabled ☐ Disabled
Who can comment	Public
Captcha	☐ Enabled ☒ Disabled
Comment's pagination	5

- **Vote:** Enable or disable vote.
- **Who can vote:** Only users in selected access level can vote.
- **Ask questions:** When voting, ask user what he/she bought and how much he/she saved (good coupon), or the reason why coupon didn't work (bad coupon).
- **Comment:** Enable or disable comment.
- **Who can comment:** Only users in selected access level can comment.
- **Captcha:** Use the captcha plugin in comment form. You may need to enter required information for your captcha plugin in the Plugin Manager.
- **Comment's pagination:** The number of comments which are displayed below coupon, this is also the number of comments which are loaded next when user want to view more comments.

3.5 Submission page

The screenshot shows the Joomla! administration interface for the CM Coupon Listing Configuration. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays 'CM Coupon Listing Configuration' and the Joomla! logo. Below the header, there are buttons for 'Save', 'Save & Close', 'Cancel', and 'Help'. The left sidebar lists various system components, including Global Configuration, AcyMailing, Akeeba Subscriptions, Banners, Cache Manager, and Check-in. The main content area is titled 'Submission page' and contains the following settings:

- General:** Access submission page (Public), Return page (Home), and Captcha (Enabled).

- **Access submission page:** Only users who are in the selected access level can access submission page to submit new coupon.
- **Return page:** The page where user is taken to after a successful submission.
- **Captcha:** Use the captcha plugin in submission form. You may need to enter required information for your captcha plugin in the Plugin Manager.

3.6 Sharing buttons

The screenshot shows the Joomla! administration interface for the CM Coupon Listing Configuration, specifically the 'Sharing buttons' tab. The top navigation bar and main header are identical to the previous screenshot. The left sidebar lists various system components, including Global Configuration, AcyMailing, Akeeba Subscriptions, Banners, Cache Manager, Check-in, CM Coupon Listing (highlighted), Contacts, Articles, Smart Search, Installation, and Manager. The main content area is titled 'Sharing buttons' and contains the following settings:

- General:** Show or hide Facebook, Twitter and Google+ sharing buttons on the following page.
- CM Coupon Listing:** Share coupon buttons on coupon list (Display), Share coupon buttons on coupon detail (Display), Share merchant buttons on merchant list (Display), and Share merchant buttons on merchant detail (Display).

- **Share coupon buttons on coupon list:** Display sharing buttons for coupon on coupon list page.
- **Share coupon buttons on coupon detail:** Display sharing buttons for coupon on coupon detail page.
- **Share merchant buttons on merchant list:** Display sharing buttons for merchant on merchant list page.
- **Share merchant buttons on merchant detail:** Display sharing buttons for merchant on merchant detail page.

3.7 Pagination

The screenshot shows the Joomla! administration interface for the CM Coupon Listing Configuration. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays the title "CM Coupon Listing Configuration" and the Joomla! logo. Below the header, there are buttons for "Save", "Save & Close", "Cancel", and "Help".

The left sidebar lists various system components, with "CM Coupon Listing" highlighted. The main content area is divided into tabs: "General", "Coupon types", "Layout", "Vote & comment", "Submission page", "Printable coupon", and "Sharing buttons". The "General" tab is active, and within it, the "Pagination" sub-tab is selected.

The "Pagination" sub-tab contains the following settings:

- Limit:** A text input field with the value "5".
- Display Select:** Radio buttons for "Display" (selected) and "Hide".
- Table Headings:** Radio buttons for "Display" (selected) and "Hide".
- Pagination:** A dropdown menu with the value "Auto".
- Pagination Results:** Radio buttons for "Display" (selected) and "Hide".

- **Limit:** Number of items displayed per page. Only applied for coupon list in categories, merchant list. Not applied for coupon list in merchant detail page.
- **Display Select:** Whether to show or hide the Display Select dropdown listbox.
- **Table Headings:** Show or Hide the headings in list layouts.
- **Pagination:** Show or hide Pagination support. Pagination provides page links at the bottom of the page that allow user to navigate to additional pages. These are needed if the information will not fit on one page.
- **Pagination Results:** Show or hide pagination results information, for example, "Page 1 of 4".

3.8 Access

The screenshot shows the Joomla! administration interface for the CM Coupon Listing Configuration. The top navigation bar and main header are identical to the previous screenshot. The left sidebar shows the "CM Coupon Listing" component selected.

The main content area has the "Access" sub-tab selected under the "General" tab. The "Access" sub-tab contains the following settings:

- Access settings:** A section header.
- Coupon's default access level:** A dropdown menu with the value "Special".

- **Coupon's default access level:** The access level group that is allowed to view coupons. This setting is applied for new coupons submitted by merchants and users in front-end.

3.9 Permissions

Pagination

Access

Permissions

Default permissions used for all content in this component.

Manage the permission settings for the user groups below. See notes at the bottom.

Action	Select New Setting ¹	Calculated Setting ²
Configure	Inherited	Not Allowed
Access Administration Interface	Inherited	Not Allowed
Create	Inherited	Not Allowed
Delete	Inherited	Not Allowed
Edit	Inherited	Not Allowed
Edit State	Inherited	Not Allowed
Edit Own	Inherited	Not Allowed

Default permissions used in CM Coupon Listing. The component doesn't support access level group in back-end so actions Create, Delete, Edit, Edit State and Edit Own are not supported.

Create menu items

CM Coupon Listing provides the following menu items:

- **Categories:** List categories and merchants in these categories.
- **Category:** List coupons in a specific category.
- **Coupon:** Used as a hidden menu item. This menu item helps you have a friendly URL for coupon detail page and manage modules displayed on the page.
- **Coupon submission:** Where user contribute new coupon to the site.
- **Coupons:** List all coupons.
- **Merchant:** Used as a hidden menu item. This menu item helps you have a friendly URL for merchant detail page and manage modules displayed on the page.
- **Merchant management area:** Where merchant edits profile and submits new coupon.
- **Merchant registration:** Merchant registration form.
- **Merchants:** List all merchants.
- **Search:** Display search form and search result.

To create hidden menu item, you need to create it inside a menu which is not assigned to any menu module so that this menu is not displayed on your site.

For example, you create a new menu “Hidden menu”, in this menu you create menu items for Coupon detail and Merchant detail page. Now this menu and these 2 menu items are available but they are not displayed on your site at all.

Merchants

5.1 Create merchant

In your Joomla! back-end, go to Components -> CMCouponListing -> Merchants to access the list of merchants on the site

The screenshot shows the Joomla! back-end interface for the CM Coupon Listing: Merchants page. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main title bar reads "CM Coupon Listing: Merchants" with the Joomla! logo. Below the title bar is a toolbar with buttons: New, Edit, Publish, Unpublish, Feature, Unfeature, and Delete. A secondary navigation bar contains links for Dashboard, Merchants, Categories, Coupons, Votes, Comments, Currencies, and Bad coupon's reasons. Below this is a search bar with the text "Search in merchant's info" and three status dropdown menus. The main content area displays a table of merchants.

☐	Title ^	Manager	Categories	Featured	Published	Active	ID
☐	Abebooks (Alias: abebooks)	Super User (Username: admin)	Books, News & Magazines	✓	✓	✓	11
☐	Automotive (Alias: automotive)	merchant01 (Username: merchant01)	Automotive Sub-Automotive	✗	✓	✓	29
☐	jcpenny (Alias: jcpenny)	jcpenny (Username: jcpenny)	Baby & Kids Clothing, Shoes & Jewelry Department Stores Health & Beauty	✓	✓	✓	6

Click "New" button on the toolbar to create a new merchant.

The screenshot shows the Joomla! administration interface for the 'CM Coupon Listing: Merchants' component. The top navigation bar includes menus for System, Users, Menus, Content, Components, Extensions, and Help. Below the navigation bar, there are buttons for Save, Save & Close, Save & New, Save as Copy, Cancel, and Send activated notification mail. A secondary navigation bar contains links for Dashboard, Merchants (active), Categories, Coupons, Votes, Comments, Currencies, and Bad coupon's reasons.

The main form is titled 'New Merchant' and is divided into two columns. The left column contains the following fields:

- Name ***: A text input field.
- Alias**: A text input field.
- Manager**: A dropdown menu with 'Select a User' and a user icon.
- Categories ***: A list of categories with checkboxes:
 - ☐ Automotive
 - ☐ — Sub-Automotive
 - ☐ Baby & Kids
 - ☐ Books, News & Magazines
 - ☐ Clothing, Shoes & Jewelry
 - ☐ Department Stores
 - ☐ Electronics & Computers
 - ☐ Food & Grocery
 - ☐ Gifts & Collectibles
 - ☐ Health & Beauty
 - ☐ Home & Garden
 - ☐ Movies, Music & Entertainment
 - ☐ Office
 - ☐ Pet Care & Supplies
 - ☐ Services
 - ☐ Sports & Outdoors
 - ☐ Toys & Games
 - ☐ Travel

The right column contains the following fields:

- Overview ***: A large text area for a short overview of the merchant.
- Logo ***: A field with a user icon, a text input, and a delete icon.
- Address**: A text input field.
- Website**: A text input field.
- Phone**: A text input field.
- Meta Description**: A text area.
- Meta Keywords**: A text area.
- Featured**: Radio buttons for Yes and No (selected).
- Published**: Radio buttons for Published (selected) and Unpublished.
- Active**: Radio buttons for Yes and No (selected).
- ID**: A text input field with the value 0.

A merchant has the following data:

- **Name:** Merchant's name.
- **Alias:** Merchant's alias for search engine friendly URL. An alias is created automatically if you don't provide any alias when you create or edit merchant.
- **Manager:** A Joomla! user who manages merchant. This Joomla! user has ability to edit merchant's profile and coupons in front-end.
- **Categories:** Categories of products/services that merchant provides.
- **Overview:** A short overview of merchant.
- **Logo:** Merchant's logo.
- **Address:** Merchant's address.
- **Website:** Merchant's website.
- **Phone:** Merchant's phone number.
- **Featured:** Merchant is featured. Coupons of featured merchants could be displayed on the top of coupon lists, you can configure this in the component's configuration.
- **Published:** Merchant and merchant's coupons are displayed in front-end if merchant is published.
- **Active:** If merchant is inactive, Joomla! user who manages merchant can't manage profile and coupons in front-end any more. Inactive merchant and his/her coupons are still displayed in front-end.

- **ID:** Record number in database.

5.2 Merchant registration

User can register as a merchant on your site via Merchant Registration menu item.

Website

5.2.1 Guest

A guest can register as a merchant and as a Joomla! user at the same time.

When a guest registers, Joomla! notification and activation mails could be sent to user and administrators, this depends on your configuration for Users component. Go to your back-end, User Manager, click Options button on toolbar to configure Users component.

5.2.2 Registered user

Registered user can login and then register as a merchant.

A user can only manage 1 merchant. If a user who already manages a merchant access registration form, he/she receives an error message.

5.2.3 Send activated notification mail

When a user registers as a merchant, a merchant is created automatically in CM Coupon Listing, however this merchant is inactive. You can edit inactive merchant, set it to “Active”, then press “Send activated notification mail” button on merchant edit page, an email is sent to merchant to notify him/her that his/her merchant account is now active and he/she can submit coupon now.

You can customize the content of activated notification mail in the language file of CM Coupon Listing component.

5.2.4 Edit profile

You need to create a menu item for “Merchant management area” page, this is where merchant manage his/her coupons and the profile information.

- **Name:** Coupon's name.
- **Alias:** Coupon's alias for search engine friendly URL. An alias is created automatically if you don't provide any alias when you create or edit coupon.
- **Short description:** A short description about coupon, it is displayed in coupon list and coupon detail pages.
- **Description:** A detailed description about coupon, it is only displayed in coupon detail page.
- **Type:** Coupon type. There are 4 types: coupon code, printable coupon, sale link and activation link. You can configure what types are used, what types are not used in the component's configuration.
 - **Coupon code:** Coupon is a code to enter when check out.
 - **Printable coupon:** Coupon is an image to print or save to smartphone and bring to merchant.
 - **Sale link:** Coupon is a deal or an offer from a third-party website.
 - **Activation link:** A link to merchant's website which automatically activates discount, no coupon code is required when checkout.

- **Merchant:** Merchant who owns coupon.
- **Categories:** Categories which coupon is in.
- **Starting date and Ending date:** The date when coupon starts valid and the date when coupon expires. Coupon is only displayed in front-end if current date is between these two dates.
- **Featured:** Featured coupons could be displayed on the top of coupon lists, you can configure this in the component's configuration.
- **Published:** Coupon is displayed in front-end if it is published.
- **Access:** Joomla!'s access level group. Only users in selected access level can see and get coupon. This is useful if you want to have some special coupons which are only available for registered users, or users who have already purchased for subscriptions on your site.
- **ID:** Record number in database.

7.2 User submits coupon in front-end

To allow users to contribute coupons to the site, you need to configure some options in *Configuration* section. The most important options is "Access submission page", it provides the options for access levels, only users in the selected access level can access the form. For example if you select "Public" then all users including guests can submit new coupon. If you want to limit access to the form you need to select a different access level, for example you select "Registered" to only allow logged-in users to access the form.

To create new new access level you can do it in your back-end (access Users -> Access Levels on the top menu).

You need to create a menu item for "Coupon submission" page. Visit the page in front-end with an account which is in the configured access level, you can see the form with less fields than the coupon form in back-end. After user submits coupon, you can receive an notification email if you enable it in the component's configuration, you need to log into your back-end, review the coupon, assign it to a correct category and publish it.

Vote and Comment

User can vote if a coupon works (good coupon) or doesn't work (bad coupon). While voting, user can also provide information about how much user saves when use the coupon (if coupon is good), or why coupon doesn't work (if coupon is a bad coupon).

You can enable/disable vote and comment, or configure some options of them in *Configuration* section.

8.1 Manage currencies

You only need to use currencies if you enable voting and asking questions in *Configuration* section. If user votes coupon as a good coupon, then user is asked how much user has saved and what item user has bought, this is when currencies is used.

Great! How much discount did you get?

I saved USD

I bought

In your back-end, navigate to Components -> CMCouponListing -> Currencies to access the list of currencies.

Click “New” button on the toolbar to create a new currency.

- **Currency name:** You can use currency name, eg. USD, or currency sign, eg. \$. This name is only for internal use, it is not visible in front-end.
- **Currency sign:** Your currency’s sign/symbol, eg. \$.
- **Currency sign’s position:** The position of your currency’s sign, before or after the amount.
- **Status:** Only published currencies are displayed in front-end.
- **Ordering:** The position of the currency in the currency list.
- **ID:** Record number in the database.

8.2 Manage reasons of bad coupon

If you enable voting and asking questions in [Configuration](#) section and user votes for a bad coupon, then user is asked why the coupon is bad. You can create some reasons for user to choose.

Go to Components -> CMCouponListing -> Bad coupon's reasons in your back-end to access the list of reasons.

Click "New" button on the toolbar to create a new reason.

- **Reason:** The reason.
- **Status:** Only published reasons are displayed in front-end.
- **Ordering:** The position of the reason in the reason list.
- **ID:** Record number in the database.

8.3 Manage votes

Go to Components -> CMCouponListing -> Votes in your back-end to access the list of votes submitted by users.

The screenshot shows the Joomla! administration interface for the 'CM Coupon Listing: Votes' component. At the top, there's a navigation bar with menus for System, Users, Menus, Content, Components, Extensions, and Help. Below this is a sub-header with the component name and Joomla! logo. A toolbar contains buttons for New, Edit, Publish, Unpublish, and Delete. A secondary navigation bar includes links to Dashboard, Merchants, Categories, Coupons, Votes (active), Comments, Currencies, and Bad coupon's reasons. A search bar is present with filters for amount and item, coupon selection, user selection, vote selection, and status selection. The main content area displays a table of votes with columns: ID, Coupon, User, Vote, Currency, Saved amount, Reason of bad coupon, Voted date, and Published. Two votes are listed: one with ID 30, a 'Bad' vote, and one with ID 29, a 'Good' vote.

ID	Coupon	User	Vote	Currency	Saved amount	Reason of bad coupon	Voted date	Published
30	Save 25-40% off Girls' and Kid's Clothing!	admin	Bad		0.00	Spam/Not a real coupon	2014-11-06 08:39:20	✓
29	Save 25-40% off Girls' and Kid's Clothing!	admin	Good	USD	20.00		2014-11-06 08:38:28	✓

You can click on the ID of the vote to edit it. You can also create a vote by yourself by clicking “New” button.

The screenshot shows the 'New Vote' form in the Joomla! administration interface. The form is divided into two main sections: 'New Vote' and 'Good coupon'. The 'New Vote' section includes fields for Coupon (a dropdown menu), User (a dropdown menu), Vote (radio buttons for Good coupon and Bad coupon), Voted date (a date picker), and Status (radio buttons for Published and Unpublished). The 'Good coupon' section includes fields for Currency (radio buttons for USD and EUR), Saved amount (a text input), and Items (a text input). The 'Bad coupon' section includes a field for Reason of bad coupon (radio buttons for Coupon is invalid, Coupon is expired, and Spam/Not a real coupon). At the top of the form, there's a navigation bar with menus for System, Users, Menus, Content, Components, Extensions, and Help. Below this is a sub-header with the component name and Joomla! logo. A toolbar contains buttons for Save, Save & Close, Save & New, Save as Copy, and Cancel. A secondary navigation bar includes links to Dashboard, Merchants, Categories, Coupons, Votes (active), Comments, Currencies, and Bad coupon's reasons.

- **Coupon:** The coupon which the vote is for.
- **User:** The user who makes the vote. If no user is selected, user is considered as a guest.
- **Vote:** Vote (good or bad coupon).
- **Voted date:** The date when user makes the vote.
- **Status:** Published status.
- **Currency:** The currency that user uses to pay for product/service with the coupon. Only used if the vote is good.
- **Saved amount:** The amount that user saves by using this coupon. Only used if the vote is good.
- **Items:** The items that users pay for by using this coupon. Only used if the vote is good.
- **Reason of bad coupon:** The reason why user votes this coupon bad. Only used if the vote is bad.

8.4 Manage comments

In back-end, to access to comment list you navigate to Components -> CMCouponListing -> Comments.

ID	User	Comment	Posted date	Published
33	admin	Very good coupon!	2014-11-06 08:40:15	✓
32	GUEST	it worked!	2014-10-29 02:13:21	✓

You can edit a comment by clicking its ID. In comment form, we have the following options.

- **Comment:** The content of the comment.
- **Posted date:** The date when the comment is posted.
- **Status:** Published status.
- **User:** The Joomla! user who posts the comment, if commenter is a registered user.
- **Guest's name:** The name of the guest who makes the comment. This value is not used if user is a registered user. If no value given, the word "Anonymous" is used.

8.5 Vote in front-end

If you enable vote in the component's configuration, you can see the vote option for every deal in front-end.

If coupon works, you click "Yes", otherwise you click "No".

Depending on your configuration, there could be another step asking for how much you save, what items you purchase if coupon is good or why you think the coupon is bad.

After your vote is submitted, you receive the message.

8.6 Comment in front-end

If you enable comment in the component's configuration, below every deal's detail there is a form for submitting new comment and the list of submitted comments.

This module lists categories in CM Coupon Listing component in alphabet order and also displays how many coupons in each category.

For SEO purpose, you should create hidden menu items for your every category of CM Coupon Listing.

After install the module via Extension Manager, you can find it in Module Manager. To find the module quickly, you

can filter for “CMCouponListing Category List” type.

The screenshot shows the Joomla! Module Manager interface. The top navigation bar includes links for System, Users, Menus, Content, Components, Extensions, and Help. The main header displays "Module Manager: Modules" and the Joomla! logo. Below the header is a toolbar with buttons for New, Edit, Duplicate, Publish, Unpublish, Check In, Trash, and Batch. A left sidebar contains a "Filter:" section with dropdown menus for Site (Administrator), Status, Position, and Type (CMCouponListin...). The main content area features a search bar, sorting options (Position, Ascending, 20), and a table of modules.

	Status	Title	Position	Type	Pages	Access	Language	ID
☐	☒	Categories	position-7	CMCouponListing Category List	All	Public	All	88

The module doesn't have any special options. You just need to publish the module on your desired template's position and menu items.

Featured Merchants module

CMCouponListing Featured Merchants module helps you list random featured merchants in CM Coupon Listing component. Merchant name's also linked to merchant's detail page, so to have friendly URLs in the module you need to create menu item for the detail page of every merchant.

After install the module via Extension Manager, you can find it in Module Manager. To find the module quickly, you can filter for "CMCouponListing Featured Merchants" type.

The module only has 1 option for the quantity of featured merchants displayed in the module.

Search module

CMCouponListing Search module displays a text field where user can enter keywords and search for coupons or merchants.

You should use this module together with “Search” page. If you create a menu item for “Search” page, you can have a friendly URL for search result page.

After install the module via Extension Manager, you can find it in Module Manager. To find the module quickly, you can filter for “CMCouponListing Search” type.

The screenshot shows the Joomla! Module Manager interface. At the top, there's a navigation bar with menus like System, Users, Menus, Content, Components, Extensions, and Help. Below this is the 'Module Manager: Modules' header. A toolbar contains buttons for New, Edit, Duplicate, Publish, Unpublish, Check In, Trash, and Batch. On the left, there's a sidebar with a 'Filter:' section containing dropdowns for Site, Status, Position, and Type. The main area displays a table of modules. The table has columns for Status, Title, Position, Type, Pages, Access, Language, and ID. One module is listed: 'Search coupon' with status 'checked', position 'position-7', type 'CMCouponListing Search', and ID '87'.

Status	Title	Position	Type	Pages	Access	Language	ID
☒	Search coupon	position-7	CMCouponListing Search	All	Public	All	87

The module doesn't have any special options.

tagcmcouponlisting plugin

This plugin is only used if you want to integrate with ACYMailing component to send coupon newsletter to your subscribers.

tagcmcouponlisting plug-in helps you insert coupons in a specific category into ACYMailing's newsletter automatically.

After install the plugin, you can find it in your Plugin Manager.

The screenshot shows the Joomla! Plugin Manager interface. At the top, there's a navigation bar with menus like System, Users, Menus, Content, Components, Extensions, and Help. Below this, the title 'Plugin Manager: Plugins' is displayed. A toolbar contains buttons for Edit, Enable, Disable, and Check In. On the right, there are Help and Options buttons. The main area features a filter section on the left with dropdowns for Status (set to 'acymailing'), Type, and Access. A search bar is also present. The central table lists installed plugins:

Status	Plugin Name	Type	Element	Access	ID
☒	CMCouponListing tag plug-in for AcyMailing tag system	acymailing	tagcmcouponlisting	Public	10151
☒	AcyMailing Tag : Manage the Subscription	acymailing	tagsubscription	Public	10143

You can find the following options in the plug-in setting:

The screenshot shows the Joomla! Plugin Manager interface. At the top, there's a navigation bar with links to System, Users, Menus, Content, Components, Extensions, and Help. The main title is "Plugin Manager: CMCouponListing tag plug-in for AcyMailing tag system". Below the title, there are buttons for "Save", "Save & Close", "Close", and "Help".

The main content area is titled "CMCouponListing tag plug-in for AcyMailing tag system". It includes a sub-header "acymailing / tagcmcouponlisting" and a description: "This plug-in inserts coupons from specific category into ACYMAILING newsletter." Below this is a "Single coupon template" editor with a rich text editor toolbar (Edit, Insert, View, Format, Table, Tools) and a text area containing the letter "p". Below the editor are buttons for "Article", "Image", "Page Break", "Read More", and "Toggle editor".

On the right side, there are settings for the plugin:

- Status:** Enabled (green button)
- Access:** Public (dropdown menu)
- Ordering:** 0. CMCouponListing tag plug-... (dropdown menu)
- Plugin Type:** acymailing (text field)
- Plugin File:** tagcmcouponlisting (text field)

At the bottom, there are additional settings:

- Sort coupons by *:** Most recent coupons first (dropdown menu)
- Sample user *:** Super User (text field with a user icon button)
- Max coupon returned:** 5 (text field)

Below the settings, there is a note: "You can use the following variable tags in single deal template: {coupon_name}, {coupon_description}, {coupon_link}, {merchant_name}, {merchant_logo}"

- **Single coupon template:** Template of a coupon in ACYMAILING newsletter. You can use HTML and CSS to design how a coupon looks like in newsletter. You can use the following variable tags, these tags will be replaced by real information of coupon:
 - {coupon_name}: Name of coupon.
 - {coupon_description}: Description of coupon.
 - {coupon_link}: Link to coupon's detail page.
 - {merchant_name}: Merchant's name.
 - {merchant_logo}: Image path to merchant's logo. You need to put this tag into a HTML tag, otherwise image is not displayed. For example: .
- **Sort coupons by:** Coupons's ordering.
- **Sample user:** If you have special coupons which are only available to a specific access level group, you can select a user who are not in this access level group so that special coupons will not be insert in newsletter.
- **Max coupon returned:** Limit how many coupons are displayed at max.

In ACYMAILING's newsletter, you can use this tag to insert a single coupon: {cmcouponlisting|category:X|ordering:Y}. "X" is the ID of the category you want to get coupons from, "Y" is the ordering number of coupon in the list of coupons returned from the plug-in.

For example, if your "Max coupon returned" is 5, and you want to get coupons from category ID 1, you can use the following tags:

{cmcouponlisting|category:1|ordering:1 }

{cmcouponlisting|category:1|ordering:2 }

{cmcouponlisting|category:1|ordering:3 }

{cmcouponlisting|category:1|ordering:4 }

{cmcouponlisting|category:1|ordering:5 }

If there are only 4 coupons found in this category, the last tag is replaced by nothing, so your newsletter template is not broken.

CMCouponListing Merchant's Coupons plugin

This plugin helps you insert list of coupons from a specific merchant into Joomla! article, Custom HTML module or any extension which supports onContentPrepare event.

After installing the plugin, you need to enable it to make it working. You can find it in Plugin Manager with the name “Content - CMCouponListing Merchant's Coupons”.

In Joomla! article or in the editor of the extension, you insert the followin tag:

```
{cmcouponlisting merchant=XX}
```

XX is the ID of the merchant in CMCouponListing. For example if merchant has ID 10, the tag should be:

```
{cmcouponlisting merchant=10}
```

The result is the list of coupons with coupon's name and coupon's short description.
