# **Django HumansTXT Documentation**

***Release 0.1.0***

**Nicolas Tobo**

October 31, 2015

<b>1 Quickstart</b>	<b>3</b>
---------------------	----------

Django HumansTXT will make it easy to you to serve humans.txt file.

---

**Quickstart**

---

Install django-humanstxt using pip (we do recommend to do it in a virtualenv).

```
pip install django-humanstxt
```

To integrate it into a Django project, simply add it to your *INSTALLED\_APPS*:

```
INSTALLED_APPS = [  
    # some interesting stuff...  
    'humanstxt',  
    # some other stuff...  
]
```

```
urlpatterns = [  
    # ...  
    url(r'^humans\.txt', include('humanstxt.urls')),  
    # ...  
]
```

```
python manage.py migrate
```

You're now ready to use the app.
