Contents:

# CHAPTER 1

---

django-indieweb

---

includes indieauth and a micropub endpoint

## 1.1 Documentation

The full documentation is at <https://django-indieweb.readthedocs.org>.

## 1.2 Quickstart

Install django-indieweb:

```
pip install django-indieweb
```

Then use it in a project:

```
import indieweb
```

## 1.3 Features

- TODO

## 1.4 Running Tests

Does the code actually work?

```
source <YOURVIRTUALENV>/bin/activate
(myenv) $ pip install -r requirements-test.txt
(myenv) $ python runtests.py
```

## 1.5 Credits

Tools used in rendering this package:

- [Cookiecutter](#)
- [cookiecutter-djangopackage](#)

# CHAPTER 2

---

## Installation

---

At the command line:

```
$ easy_install django-indieweb
```

Or, if you have virtualenvwrapper installed:

```
$ mkvirtualenv django-indieweb
$ pip install django-indieweb
```

# CHAPTER 3

---

## Usage

---

To use django-indieweb in a project:

```
import indieweb
```

# CHAPTER 4

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

### 4.1 Types of Contributions

#### 4.1.1 Report Bugs

Report bugs at <https://github.com/ephes/django-indieweb/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 4.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

#### 4.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

#### 4.1.4 Write Documentation

django-indieweb could always use more documentation, whether as part of the official django-indieweb docs, in doc-strings, or even on the web in blog posts, articles, and such.

#### 4.1.5 Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/ephes/django-indieweb/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 4.2 Get Started!

Ready to contribute? Here's how to set up *django-indieweb* for local development.

1. Fork the *django-indieweb* repo on GitHub.

2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/django-indieweb.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv django-indieweb
$ cd django-indieweb/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you're done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 indieweb tests
$ python setup.py test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

## 4.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.6, 2.7, and 3.3, and for PyPy. Check [https://travis-ci.org/ephes/django-indieweb/pull\\_requests](https://travis-ci.org/ephes/django-indieweb/pull_requests) and make sure that the tests pass for all supported Python versions.

## 4.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_indieweb
```

# CHAPTER 5

---

## Credits

---

### 5.1 Development Lead

- Jochen Wersdörfer <[jochen-indieweb@wersdoerfer.de](mailto:jochen-indieweb@wersdoerfer.de)>

### 5.2 Contributors

None yet. Why not be the first?

# CHAPTER 6

---

## History

---

### 6.1 0.0.4 (2016-06-14)

- exempt csrf checking

### 6.2 0.0.3 (2016-06-13)

- added migrations

### 6.3 0.0.2 (2016-05-15)

- Auth and Token endpoints with some tests.

### 6.4 0.0.1 (2016-05-14)

- First release on PyPI.
