# **django-site-access Documentation**

***Release 0.1.1***

**James Tauber and contributors**

March 15, 2016

<b>1</b>	<b>Development</b>	<b>1</b>
----------	--------------------	----------

The source repository can be found at <https://github.com/pinax/django-site-access/>

## 1.1 Contents

### 1.1.1 ChangeLog

#### 0.1

- initial release

### 1.1.2 Installation

- To install

```
pip install django-site-access
```

- Add 'django-site-access' to your INSTALLED\_APPS setting:

```
INSTALLED_APPS = (  
    # other apps  
    "site_access",  
)
```

### 1.1.3 Usage

Using *django-site-access* is pretty simple:

1. Add the middleware to your settings:

```
MIDDLEWARE_CLASSES = [  
    ...  
    "django.middleware.common.CommonMiddleware",  
    "site_access.middleware.BasicAuthMiddleware",  
    "django.contrib.sessions.middleware.SessionMiddleware",  
    ....  
]
```

2. Configure the settings:

```
SITE_ACCESS_SETTINGS = {  
    "basic-auth": {  
        "domain": "staging.yoursite.com",  
        "realm": "MyStagingSite",  
        "username": "someshareduser",  
        "password": "somenotsosecretpassword"  
    }  
}
```
