1.1 Last change

- [Previous change](#)

1.2 Purpose

This Domogik plugin XeeDevices allow user to see informations from xee API (Car/Car.status).

You Need to create a Xee dev account here <https://dev.xee.com/register> and create an apps.

In redirect url don't forget to put <http://localhost> and for Scopes select all.

Here is an the related docs from xee apidoc: <https://dev.xee.com/doc/setup/README.html>

Save your apps Id and Secret. You will need them later to configure the plugin.

1.3 Plugin configuration

1.3.1 Configuration

In Domogik administration section, go to client plugin-xeedevice details page.

Key	Default value	Description
