
Eloquent JSON Schema Documentation

Release 0.9.0

Folklore,David Mongeau-Petitpas

Jan 07, 2019

1	Installation	1
1.1	Dependencies	1
1.2	Laravel 5.5	1
1.3	Laravel <= 5.4.x	2
1.4	Lumen	2
2	Getting started	3
3	Indices and tables	5

1.1 Dependencies

- Laravel 5.x or Lumen
- JSON Schema

1- Require the package via Composer in your `composer.json`.

```
{
    "require": {
        "folklore/eloquent-json-schema": "~0.9.0"
    }
}
```

2- Run Composer to install or update the new requirement.

```
$ composer install
```

or

```
$ composer update
```

1.2 Laravel 5.5

1- Publish the configuration file

```
$ php artisan vendor:publish --provider=
↳ "Folklore\EloquentJsonSchema\JsonSchemaServiceProvider"
```

2- Review the configuration file

```
config/json-schema.php
```

1.3 Laravel <= 5.4.x

1- Add the service provider to your config/app.php file

```
Folklore\EloquentJsonSchema\JsonSchemaServiceProvider::class,
```

2- Publish the configuration file

```
$ php artisan vendor:publish --provider=  
↪ "Folklore\EloquentJsonSchema\JsonSchemaServiceProvider"
```

3- Review the configuration file

```
config/json-schema.php
```

1.4 Lumen

1- Load the service provider in bootstrap/app.php

```
$app->register(Folklore\EloquentJsonSchema\JsonSchemaServiceProvider::class);
```

2- Publish the configuration file

```
$ php artisan json-schema:publish
```

3- Load configuration file in bootstrap/app.php

Important: this command needs to be executed before the registration of the service provider

```
$app->configure('json-schema');  
...  
$app->register(Folklore\EloquentJsonSchema\JsonSchemaServiceProvider::class)
```

4- Review the configuration file

```
config/json-schema.php
```

CHAPTER 2

Getting started

CHAPTER 3

Indices and tables

- `genindex`
- `modindex`
- `search`
