
FireGento_FastSimpleImport2 Documentation

Release 1.0

FireGento Team

Jun 12, 2017

1	Installation	3
1.1	Installation Instructions for latest stable Version	3
1.2	Installation Instructions for the latest development/contribution Version	3
2	Importing Products	5
2.1	Simple Product	5
3	Importing Categories	7
3.1	Category Import	7
4	Appendix : Fieldnames	9
4.1	Products Fields	9
5	Indices and tables	13

Contents:

Installation Instructions for latest stable Version

```
composer require firegento/fastsimpleimport  
bin/magento module:enable FireGento_FastSimpleImport  
bin/magento setup:upgrade
```

Installation Instructions for the latest development/contribution Version

```
composer config repositories.firegento_fastsimpleimport vcs https://github.com/  
↪firegento/FireGento_FastSimpleImport2  
composer require firegento/fastsimpleimport dev-master  
bin/magento module:enable FireGento_FastSimpleImport  
bin/magento setup:upgrade
```

Simple Product

You can call the import from your own Magento 2 code. Example:

```
/** @var \FireGento\FastSimpleImport\Model\Importer $importerModel */
$importerModel = $this->objectManager->create(
    ↪ 'FireGento\FastSimpleImport\Model\Importer');

$productsArray = [
    [
        'sku' => 'firegento-test',
        'attribute_set_code' => 'Default',
        'product_type' => 'simple',
        'product_websites' => 'base',
        'name' => 'FireGento Test Product',
        'price' => '14.0000',
    ],
];

try {
    $importerModel->processImport($productsArray);
} catch (\Exception $e) {
    $output->writeln($e->getMessage());
}

print_r($importerModel->getLogTrace());
print_r($importerModel->getErrorMessage());
```

You can find more examples in our [demo module](#). We have implemented a few command line commands which demonstrate the usage of FastSimpleImport in a custom module.

Importing Categories

Category Import

You can call the import from your own Magento 2 code. Example:

```
/** @var \FireGento\FastSimpleImport\Model\Importer $importerModel */
$importerModel = $this->objectManager->create(
    ↪ 'FireGento\FastSimpleImport\Model\Importer');

$categoryArray = [
    [
        '_root' => 'Default Category',
        '_category' => 'FireGento TestCategory',
        'description' => 'Test',
        'is_active' => '1',
        'include_in_menu' => '1',
        'meta_description' => 'Meta Test',
        'available_sort_by' => 'position',
        'default_sort_by' => 'position',
    ],
];

$importerModel->setEntityCode('catalog_category');

try {
    $importerModel->processImport($categoryArray);
} catch (\Exception $e) {
    $output->writeln($e->getMessage());
}

print_r($importerModel->getLogTrace());
print_r($importerModel->getErrorMessage());
```

Appendix : Fieldnames

Products Fields

Table 4.1: “Product Fields”

Fieldname	Explanation
sku	SKU of Product
store_view_code	StoreView Code of the StoreView to import
attribute_set_code	Attribute Set Code
product_type	Product Type
categories	TODO
product_websites	TODO
name	TODO
description	TODO
short_description	TODO
weight	TODO
product_online	TODO
tax_class_name	TODO
visibility	TODO
price	TODO
special_price	TODO
