1.1	Listing Agencies . . . . .	1

---

## Contact APIs

---

### 1.1 Listing Agencies

#### 1.1.1 GET /api/agency/

Lists all agencies for whom a FOIA request can be submitted.

It also includes components within those agencies that are large enough (and well known enough) to have their own FOIA system. Examples are such components are:

- Census Bureau
- Federal Bureau of Investigation

The information returned for each entity is like the following:

```
{
  "objects": [
    {
      "slug": "administration-for-community-living",
      "keywords": null,
      "abbreviation": "ACL",
      "description": "ACL brings together the efforts and achievements of the Administration on Aging",
      "name": "Administration for Community Living",
      "common_requests": [

    ]
    },
    {
      "slug": "administrative-conference-of-the-united-states",
      "keywords": [
        "Administrative practice and procedure",
        "Freedom of information",
        "Privacy"
      ],
      "abbreviation": "ACUS",
      "description": "The Administrative Conference of the United States is an independent federal agency",
      "name": "Administrative Conference of the United States",
      "common_requests": [

    ]
    }
  ]
  ...
}
```

```
]
}
```

### 1.1.2 GET /api/agency/?query={{search terms}}

To search agencies, you can provide the parameter ‘query’. A GET request with this query string will initiate a full-text search across the following Agency fields weighted in the following order: name, abbreviation, slug, description, and keywords.

By default, search terms are connect with boolean “AND”; hence, the queries “/api/agency/?query=justice+punishment” and “/api/agency/?query=justice+AND+punishment” only return agencies that have both terms:

```
{
  "objects": [
    {
      "keywords": [
        "Accounting",
        "Administrative practice and procedure",
        ...
      ],
      "description": "The Department of Justice works to enforce federal law, to seek just punish",
      "common_requests": "[]",
      "name": "Department of Justice",
      "abbreviation": "DOJ",
      "slug": "department-of-justice"
    }
  ]
}
```

Explicitly using “OR” as in “/api/agency/?query=justice+OR+punishment” expands the search to include agencies that have at least one of the keywords:

```
{
  "objects": [
    {
      "keywords": [
        "Accounting",
        "Administrative practice and procedure",
        ...
      ],
      "description": "The Department of Justice works to enforce federal law, to seek just punish",
      "common_requests": "[]",
      "name": "Department of Justice",
      "abbreviation": "DOJ",
      "slug": "department-of-justice"
    },
    {
      "keywords": [
        "Intergovernmental relations",
        "Investigations",
        ...
      ],
      "description": "As an intelligence-driven and a threat-focused national security organizatio",
      "common_requests": "[]",
      "name": "Federal Bureau of Investigation",
      "abbreviation": "FBI",
    }
  ]
}
```

```

        "slug": "federal-bureau-of-investigation"
    },
    {
        "keywords": [
            "Accountants",
            "Accounting",
            ...
        ],
        "description": "The Department of the Treasury manages Federal finances by collecting taxes",
        "common_requests": "[]",
        "name": "Department of the Treasury",
        "abbreviation": "Treasury",
        "slug": "department-of-the-treasury"
    }
    ... (more agencies)
}

```

### 1.1.3 GET /api/agency/{{slug}}

Where {{slug}} is a slug that identifies an agency.

This returns the following agency data:

```

{
    "toll_free_phone": null,
    "description": "The Social Security Administration assigns social security numbers; administers th",
    "fax": "410-966-0869",
    "street": "617 Altmeyer Building",
    "is_a": "agency",
    "city": "Baltimore",
    "address_lines": [
        "Dawn S. Wiggins",
        "Principal Public FOIA Liaison",
        "Office of the General Counsel, Office of Privacy and Disclosure"
    ],
    "phone": "410-965-1727",
    "foia_libraries": [
        {
            "url": "http: //www.ssa.gov/foia/readingroom.html",
            "link_text": "FOIA Library"
        }
    ],
    "complex_processing_time": 45.0,
    "no_records_about": [

    ],
    "request_form_url": "https: //secure.ssa.gov/apps9/eFOIA-FEWeb/internet/main.jsp?action=OPD",
    "abbreviation": "SSA",
    "agency_slug": "social-security-administration",
    "person_name": "Rhonda Smith",
    "agency_name": "Social Security Administration",
    "offices": [

    ],
    "office_url": "http: //www.ssa.gov/foia/",
    "common_requests": [

```

```
    ],
    "keywords": [
      "Accounting",
      "Administrative practice and procedure",
      "Adult education",
      ...
    ],
    "simple_processing_time": 18.0,
    "zip_code": "21235",
    "emails": [
      "Foia.pa.officers@ssa.gov"
    ],
    "public_liaison_name": "Dawn S. Wiggins",
    "public_liaison_email": null,
    "name": "Social Security Administration",
    "public_liaison_phone": "410-965-1727",
    "state": "MD",
    "slug": "social-security-administration"
  }
}
```

### Processing Times.

The response for each entity provides two statistics around the processing times for FOIA requests:

1. `simple_processing_time`
2. `complex_processing_time`

Both values are presented in number of working days.

‘Simple’ and ‘Complex’ requests are defined as the following by foia.gov:

Complex request: “Complex requests are FOIA requests that an agency anticipates will involve a voluminous amount of material to review or will be time consuming to process.”

Simple request: “A FOIA request that an agency anticipates will involve a small volume of material or will be able to processed relatively quickly.”

### FOIA Libraries

The response for each entity provides a `foia_libraries` list. A FOIA library is a URL to an online page that lists responsive documents an entity has decided to make available publicly. This is a list because agencies/offices sometimes have multiple FOIA libraries.

- `url`: The URL of the online FOIA library
- `link_text`: The link text that is associated with that library. This helps a human determine the difference between libraries.

## 1.1.4 GET /api/office/{slug}

Where `{{slug}}` is a slug that identifies an office (a component of an agency).

This returns the following office information:

```
{
  "toll_free_phone": null,
  "fax": "202-501-8013",
  "street": "14th Street and Constitution Avenue, NW",
  "city": "Washington",
  "address_lines": [
```

```

    "Stacy Cheney",
    "FOIA Officer, Office of the Chief Counsel",
    "Room 4713"
  ],
  "phone": "202-482-1816",
  "foia_libraries": [

  ],
  "complex_processing_time": 18.0,
  "request_form_url": "https: //foiaonline.regulations.gov/foia/action/public/home",
  "agency_slug": "department-of-commerce",
  "person_name": null,
  "agency_name": "Department of Commerce",
  "agency_description": "The historic mission of the Department of Commerce is \"to foster, promote,
  \"is_a\": \"office\",
  "office_url": "http: //www.ntia.doc.gov/ntiahome/occ/foia.html",
  "office_slug": "national-telecommunications-and-information-admini",
  "id": 174,
  "simple_processing_time": 7.0,
  "zip_code": "20230",
  "emails": [
    "eFOIA@ntia.doc.gov"
  ],
  "public_liaison_name": "Stacy Cheney",
  "public_liaison_email": null,
  "name": "National Telecommunications and Information Administration",
  "public_liaison_phone": "202-482-1816",
  "state": "DC",
  "slug": "department-of-commerce--national-telecommunications-and-information-admini"
}

```
