Contents:

CHAPTER 1

heat1d

Thermal model for planetary science applications (Python version)

- Free software: MIT license
- Documentation: <https://heat1d.readthedocs.io>.

See the [notebook](#) for an example.

1.1 Features

- Modeling 1D heat transfer in planetary surfaces
- Provides library of required planetary surface parameters
- Plotting helpers (see [notebook](#))

1.2 Installation

```
pip install heat1d
```

1.3 Credits

Author: P. Hayne

Package maintainer: K.-Michael Aye

This package was created with [Cookiecutter](#) and the forked [michaelaye/cookiecutter-pypackage-conda](#) project template.

CHAPTER 2

Installation

2.1 Stable release

To install heat1d, run this command in your terminal:

```
$ pip install heat1d
```

This is the preferred method to install heat1d, as it will always install the most recent stable release.

If you don't have `pip` installed, this Python installation [guide](#) can guide you through the process.

2.2 From sources

The sources for heat1d can be downloaded from the [Github repo](#).

You can either clone the public repository:

```
$ git clone git://github.com/phayne/heat1d
```

Or download the [tarball](#):

```
$ curl -OL https://github.com/phayne/heat1d/tarball/master
```

Once you have a copy of the source, you can install it with:

```
$ python setup.py install
```

CHAPTER 3

Usage

To use heat1d in a project:

```
import heat1d
```

CHAPTER 4

Credits

4.1 Original Development

- Paul O. Hayne <paul.hayne@lasp.colorado.edu>, 2017

4.2 Package Maintainer

- K.-Michael Aye <kmichael.aye@gmail.com>, 2019

CHAPTER 5

History

5.1 0.1.0 (2019-05-21)

- First release on PyPI.

5.2 0.1.4 (2019-07-19)

- release planets as its own library

** This means it's now a dependency of this project * First documentation pages are now live at heat1d.readthedocs.org

CHAPTER 6

Indices and tables

- genindex
- modindex
- search
