# **py<sub>t</sub>ools***Documentation*

***Release 0.1.11***

**Thorsten Beier**

**Jul 31, 2019**

**CONTENTS:**

**1 py\_tools 1**  
1.1 Features . . . . . 1

**2 Installation 3**

**3 Usage 5**

**4 Examples 7**  
4.1 This is my example script . . . . . 7

**5 API 9**  
5.1 py\_tools . . . . . 9

**6 Contributing 11**  
6.1 Types of Contributions . . . . . 11  
6.2 Pull Request Guidelines . . . . . 12

**7 Credits 13**  
7.1 Development Lead . . . . . 13  
7.2 Contributors . . . . . 13

**8 History 15**  
8.1 0.1.0 (2019-07-31) . . . . . 15

**9 Indices and tables 17**

**Python Module Index 19**

**Index 21**

## 1.1 Features

**Current features include:**

- conda ready
- pytest unit test
- continuous integration
- coverall code coverage
- documentation with sphinx
- documentation on readthedocs

## INSTALLATION

todo

## USAGE

To use `py_tools` in a project:

```
import py_tools
```

## EXAMPLES

---

**Note:** Click [here](#) to download the full example code

---

### 4.1 This is my example script

This example doesn't do much, it just makes a simple plot

#### 4.1.1 This is a section header

This is the first section! The `###` signifies to Sphinx-Gallery that this text should be rendered as rST and if using one of the above IDE/plugin's, also signifies the start of a 'code block'.

```
import py_tools

# This line won't be rendered as rST because there's a space after the last block.
myvariable = 2
print("my variable is {}".format(myvariable))
# This is the end of the 'code block' (if using an above IDE). All code within
# this block can be easily executed all at once.
```

Out:

```
my variable is 2
```

#### 4.1.2 This is another section header

In the built documentation, it will be rendered as rST after the code above! This is also another code block.

```
print('my variable plus 2 is {}'.format(myvariable + 2))
```

Out:

```
my variable plus 2 is 4
```

### 4.1.3 This is another section header

Plots look nice in examples

```
import matplotlib.pyplot as plt

plt.plot([1,23,2,4])
plt.ylabel('some numbers')

plt.show()
```

**Total running time of the script:** ( 0 minutes 0.423 seconds)

## 5.1 py\_tools

### 5.1.1 py\_tools package

#### Subpackages

#### py\_tools.cli package

#### Submodules

#### py\_tools.cli.main module

#### Module contents

#### Submodules

#### py\_tools.version module

#### Module contents

```
py_tools.pure_python()  
hello
```

## CONTRIBUTING

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given. You can contribute in many ways:

### 6.1 Types of Contributions

#### 6.1.1 Report Bugs

Report bugs at [https://github.com/DerThorsten/py\\_tools/issues](https://github.com/DerThorsten/py_tools/issues).

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

#### 6.1.2 Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” and “help wanted” is open to whoever wants to implement it.

#### 6.1.3 Implement Features

Look through the GitHub issues for features. Anything tagged with “enhancement” and “help wanted” is open to whoever wants to implement it.

#### 6.1.4 Write Documentation

py\_tools could always use more documentation, whether as part of the official py\_tools docs, in docstrings, or even on the web in blog posts, articles, and such.

#### 6.1.5 Submit Feedback

The best way to send feedback is to file an issue at [https://github.com/DerThorsten/py\\_tools/issues](https://github.com/DerThorsten/py_tools/issues).

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

## 6.2 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function / classes with a proper documentation, and add the feature to the list in README.rst.

## CREDITS

### 7.1 Development Lead

- Thorsten Beier <[derthorstenbeier@gmail.com](mailto:derthorstenbeier@gmail.com)>

### 7.2 Contributors

None yet. Why not be the first?

## HISTORY

### 8.1 0.1.0 (2019-07-31)

- First release on PyPI.

## INDICES AND TABLES

- `genindex`
- `modindex`
- `search`

## PYTHON MODULE INDEX
