# CHAPTER 1

---

## Overview

---

docs	
tests	
package	

Create Markov models trained on Internet Archive text files.

- Free software: BSD license

### 1.1 Installation

```
pip install ia-markov
```

### 1.2 Quick Start

```
from ia_markov import MarkovModel

m = MarkovModel()
m.train_model('FuturistManifesto')
m.model.make_sentence()
'Courage, audacity, and revolt will be drunk with love and admiration for us.'
```

## 1.3 Documentation

<https://python-ia-markov.readthedocs.io/>

## 1.4 Development

To run the all tests run:

```
tox
```

Note, to combine the coverage data from all the tox environments run:

Windows	<pre>set PYTEST_ADDOPTS==cov-append tox</pre>
Other	<pre>PYTEST_ADDOPTS==cov-append tox</pre>

# CHAPTER 2

---

## Installation

---

At the command line:

```
pip install ia-markov
```

# CHAPTER 3

---

## Usage

---

To use ia-markov in a project:

```
import ia_markov
```

# CHAPTER 4

---

Reference

---

## 4.1 ia\_markov

# CHAPTER 5

---

## Contributing

---

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given.

### 5.1 Bug reports

When reporting a bug please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

### 5.2 Documentation improvements

ia-markov could always use more documentation, whether as part of the official ia-markov docs, in docstrings, or even on the web in blog posts, articles, and such.

### 5.3 Feature requests and feedback

The best way to send feedback is to file an issue at <https://github.com/accraze/python-ia-markov/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that code contributions are welcome :)

## 5.4 Development

To set up *python-ia-markov* for local development:

1. Fork [python-ia-markov](#) (look for the “Fork” button).
2. Clone your fork locally:

```
git clone git@github.com:your_name_here/python-ia-markov.git
```

3. Create a branch for local development:

```
git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

4. When you’re done making changes, run all the checks, doc builder and spell checker with [tox](#) one command:

```
tox
```

5. Commit your changes and push your branch to GitHub:

```
git add .  
git commit -m "Your detailed description of your changes."  
git push origin name-of-your-bugfix-or-feature
```

6. Submit a pull request through the GitHub website.

### 5.4.1 Pull Request Guidelines

If you need some code review or feedback while you’re developing the code just make the pull request.

For merging, you should:

1. Include passing tests (run [tox](#))<sup>1</sup>.
2. Update documentation when there’s new API, functionality etc.
3. Add a note to `CHANGELOG.rst` about the changes.
4. Add yourself to `AUTHORS.rst`.

### 5.4.2 Tips

To run a subset of tests:

```
tox -e envname -- py.test -k test_myfeature
```

To run all the test environments in *parallel* (you need to `pip install detox`):

```
detox
```

---

<sup>1</sup> If you don’t have all the necessary python versions available locally you can rely on Travis - it will [run the tests](#) for each change you add in the pull request.

It will be slower though ...

# CHAPTER 6

---

## Authors

---

- Andy Craze - accraze.info

# CHAPTER 7

---

## Changelog

---

### 7.1 0.2.0 (2018-7-29)

- Added ability to set custom hidden state sizes
- Fix flaky model test

### 7.2 0.1.3 (2018-7-22)

- EOL Py2.7 and Windows support
- Fix docs CI build

### 7.3 0.1.2 (2018-7-21)

- Test mocks when downloading corpus
- Deprecate Windows/appveyor support

### 7.4 0.1.1 (2018-7-14)

- Fixed failing flake8 check tests
- Updated travis CI build config

### 7.5 0.1.0 (2016-11-27)

- First release on PyPI.
