1.1 wowapi

1.1.1 wowapi package

Submodules

wowapi.api module

class wowapi.api.**WowApi** (*client_id, client_secret*)

Bases: object

get_achievement (*region, id, **filters*)

Achievement api

```
>>> WowApi.get_achievement('us', 2144, locale='pt_BR')
```

get_auctions (*region, realm_slug, **filters*)

Auctions data status

get_battlegroups (*region, **filters*)

Data resources api - all battlegroups

get_boss (*region, id, **filters*)

Boss api - Boss details

get_bosses (*region, **filters*)

Boss api - Master list of bosses

get_character_achievements (*region, **filters*)

Data resources api - all character achievements

get_character_classes (*region, **filters*)

Data resources api - all character classes

get_character_profile (*region, realm, character_name, **filters*)
Character profile api - base info or specific comma separated fields as filters

```
>>> api = WowApi('client-id', 'client-secret')
>>> api.get_character_profile('eu', 'khadgar', 'patchwerk')
>>> api.get_character_profile('eu', 'khadgar', 'patchwerk', locale='en_GB',
↪ fields='guild,mounts')
```

get_character_races (*region, **filters*)
Data resources api - all character races

get_connected_realm (*region, namespace, connected_realm_id, **filters*)
Game data api - get connected realm by id

get_connected_realms (*region, namespace, **filters*)
Game data api - get connected realms

get_data_resource (*url, region*)

get_guild_achievements (*region, **filters*)
Data resources api - all guild achievements

get_guild_perks (*region, **filters*)
Data resources api - all guild perks

get_guild_profile (*region, realm, guild_name, **filters*)
Guild profile api - base info or specific comma separated fields as filters

```
>>> api = WowApi('client-id', 'client-secret')
>>> api.get_guild_profile('eu', 'khadgar')
>>> api.get_guild_profile('eu', 'khadgar', locale='en_GB', fields=
↪ 'achievements,challenge')
```

get_guild_rewards (*region, **filters*)
Data resources api - all guild rewards

get_item (*region, id, **filters*)
Item api - detail item

get_item_classes (*region, **filters*)
Data resources api - all item classes

get_item_set (*region, id, **filters*)
Item api - detail item set

get_leaderboards (*region, bracket, **filters*)
Pvp api - pvp bracket leaderboard and rbg

get_mounts (*region, **filters*)
Mounts api - all supported mounts

get_mythic_keystone_affix (*region, namespace, affix_id, **filters*)
Game data api - get mythic keystone affix by id

get_mythic_keystone_affixes (*region, namespace, **filters*)
Game data api - get mythic keystone affixes

get_mythic_keystone_dungeon (*region, namespace, dungeon_id, **filters*)
Game data api - get mythic keystone dungeon by id

get_mythic_keystone_dungeons (*region, namespace, **filters*)
Game data api - get all mythic keystone dungeons

get_mythic_keystone_leaderboard (*region, namespace, connected_realm_id, dungeon_id, period, **filters*)
 Game data api - get a weekly mythic keystone leaderboard by period

get_mythic_keystone_leaderboards (*region, namespace, connected_realm_id, **filters*)
 Game data api - get mythic keystone leaderboard dungeons for a connected realm id

get_mythic_keystone_period (*region, namespace, period_id, **filters*)
 Game data api - get mythic keystone period by id

get_mythic_keystone_periods (*region, namespace, **filters*)
 Game data api - get all mythic keystone periods

get_mythic_keystone_season (*region, namespace, season_id, **filters*)
 Game data api - get mythic keystone season by id

get_mythic_keystone_seasons (*region, namespace, **filters*)
 Game data api - get all mythic keystone seasons

get_mythic_keystones (*region, namespace, **filters*)
 Game data api - get links to documents related to mythic keystone dungeons

get_mythic_raid_leaderboard (*region, namespace, raid, faction, **filters*)
 Game data api - get mythic raid leaderboard of specific faction

get_pet_ability (*region, id, **filters*)
 Pets api - pet ability details

get_pet_species (*region, id, **filters*)
 Pets api - pet species details

get_pet_stats (*region, id, **filters*)
 Pets api - pet stats details

get_pet_types (*region, **filters*)
 Data resources api - all pet types

get_pets (*region, **filters*)
 Pets api - all supported pets

get_playable_class (*region, namespace, class_id, **filters*)
 Game data api - get playable classes by class id

get_playable_class_pvp_talent_slots (*region, namespace, class_id, **filters*)
 Game data api - get pvp talent slots for a playable class by id

get_playable_classes (*region, namespace, **filters*)
 Game data api - get available playable classes

get_playable_specialization (*region, namespace, spec_id, **filters*)
 Game data api - get playable specialization by spec id

get_playable_specializations (*region, namespace, **filters*)
 Game data api - get playable specializations

get_power_type (*region, namespace, power_type_id, **filters*)
 Game data api - get power type by id

get_power_types (*region, namespace, **filters*)
 Game data api - get power types

get_quest (*region, id, **filters*)
 Quest api - metadata for quests

get_race (*region, namespace, race_id, **filters*)
Game data api - get race by id

get_races (*region, namespace, **filters*)
Game data api - get races

get_realm (*region, namespace, realm_slug, **filters*)
Game data api - get realm by realm slug

get_realm_leaderboard (*region, realm, **filters*)
Challenge mode api - realm leaderboard

get_realm_status (*region, **filters*)
Realm status api - realm status for region

get_realms (*region, namespace, **filters*)
Game data api - get realms

get_recipe (*region, id, **filters*)
Recipe api - recipe details

get_region (*region, namespace, region_id, **filters*)
Game data api - get region by region id

get_region_leaderboard (*region, **filters*)
Challenge mode api - region leaderboard

get_regions (*region, namespace, **filters*)
Game data api - get regions

get_resource (*resource, region, *args, **filters*)

get_spell (*region, id, **filters*)
Spell api - spell details

get_talents (*region, **filters*)
Data resources api - all talents, specs and glyphs for each class

get_token (*region, namespace, **filters*)
Game data api - get Wow token

get_zone (*region, id, **filters*)
Zone api - detail zone

get_zones (*region, **filters*)
Zone api - master list

wowapi.exceptions module

exception wowapi.exceptions.WowApiException
Bases: exception.Exception

exception wowapi.exceptions.WowApiOauthException
Bases: *wowapi.exceptions.WowApiException*
