!!IMPORTANT! THIS CMS IS IN WORK. YOU SHOULD NOT USE IT BEFORE RELEASE 1.0

RPICMS is a lowweight CMS for the Raspberry Pi. I (MTRNord) work on this and will release v1 when eveything work.

1.1 How to Use

1.1.1 Getting Started

Needed

- Webserver (Tested with apache2 and nginx)
- PHP5
- MYSQL

Download

To download it you only need to run this command in the directory where RPICMS should run.

```
git clone git://github.com/MTRNord/RPICMS.git # Downloade dir die Dateien
```

Installation

Now you need to open a web browser an go on your webserver you need to fill everything. Next steps are automatic.
