Dummy Server API Specification Documentation
Release 1.0.0

Release 1.0.0

Kevin Wu

September 28, 2016

Contents

Introduction:

This document describe server APIs request/response json format.

Documentation:

2.1 Get Started

2.2 User

2.2.1 Introduction

In this chapter, we will explore how you can perform user related requests on server.

2.2.2 Register

Note: In the following examples, we will make use of **JMSDiExtraBundle_**, and **SensioFrameworkExtraBundle_**. This is by no means required when you implement this in your own application though.

Warning: We have completely left out any security considerations, in a real-world scenario, you have to make sure the following actions are sufficiently covered by access rules, for example by using @PreAuthorize from **JMSSecurityExtraBundle_**.

---

public class Test { }

2.2.3 Login

2.2.4 Logout

2.3 Board

2.4 Group
