
Structurizr Python Documentation

Release 0.1.0

Sixty North AS

Sep 01, 2017

Contents:

1	Design Principles	1
2	Indices and tables	3

CHAPTER 1

Design Principles

Some design principles for the port:

- We prefer PEP 8 naming for the Python API.
- We raise appropriate exceptions for a Python program (*e.g.* `ValueError` and `KeyError`)
- We'll start with a fairly literal translation of the Java API, with `getFoo` and `setFoo()` but migrate to Python properties where appropriate.

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
