# CHAPTER 1

---

## New Ticket

---

Users can create tickets for their concerns/queries through [createIT](#) support website, comments/posts on [themeforest](#) or [CodeCanyon](#) website, or Emails.

### 1.1 Support Website

To create a ticket through the support website, users must go to [createIT](#) support website and make the ticket there.

**SUPPORT HOURS: MO-FR, 10:00AM - 6:00PM UTC+1**  
CURRENT UTC+1 TIME: 01:00 PM  
SUPPORT FORUM IS CLOSED

**Support forum closed on the first of November**  
Dear Users! Please note that Support Forum will be closed on Wednesday, November 1st due to All Saint's Day.

Users select the department which their concerns/queries are relevant, so that it can be sorted to the right department.

### Select a Department

Please click on the relevant department for your issue below.

**WordPress**  
WordPress Themes and Plugins available on Envato Market

**HTML/Javascripts**  
HTML Templates and Javascript plugins available on Envato Market

For new users, they have the option to create a personal account or provide some details to which the reply for the tickets are sent.

### Enter your details

Please enter your details below, or login to your account if you have one.

**First Name**

**Last Name**

**Email**

**Organisation**

(optional)

**SUBMIT**

For users that have their own accounts, they can login to their account to make the tickets.

**LOGIN**

## 1.2 Comments / Posts

To create a ticket through commenting/posting on the [themeforest](#) or [CodeCanyon](#) website, users search for the product that they have a concern/query about and click on that.

Users are directed to the page for the product. On the page, click on the *Comments* button.

Users are directed to the *Discussion* for the said product. There, users can write their comments or replies.

**Note : Users must login to their account to be able to write and interact with a comment**

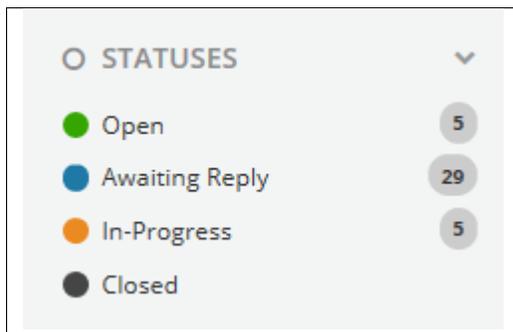

## 1.3 Email

Emailed tickets are created when the user sends an Email to the *Default SLA Email*. In replying to an Email, the *Ticket Number* must be written as the subject of the Email.

Tickets that the users make, through createIT support website, comments/posts on [themeforest](#) or [CodeCanyon](#) website, or Emails, are collated for easy response and monitoring. In managing these, tickets are filtered, sorted and tagged.

### 2.1 Status

The filter *Status* of a ticket determines the condition of a ticket, if it's **Open**, **Awaiting Reply**, **In-Progress**, or **Closed**

- **Open** - A ticket's status is *Open* when it has not been opened by any support.
- **Awaiting Reply** - A ticket's status is *Awaiting Reply* when a support has replied to a ticket and the user has not yet replied.
- **In-Progress** - A ticket's status is *In-Progress* when the user replied to an answer from his previous query.
- **Closed** - A ticket's status is *Closed* when the ticket has been resolved or if the ticket has been inactive and the system closed it automatically.

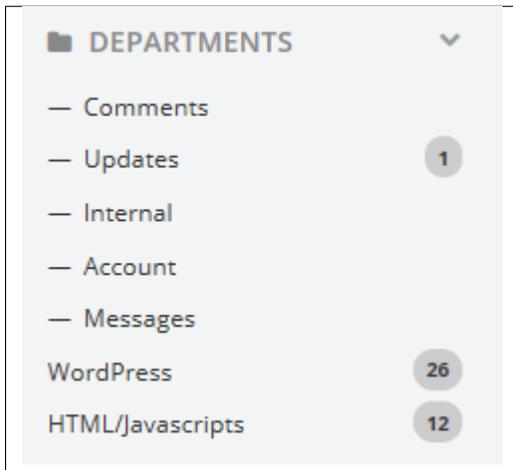

**Close Inactive Tickets**

Days      Hours      Mins

The time after which inactive tickets are automatically closed, set to 0 to never close tickets automatically.

## 2.2 Department

This is use to filter the tickets by department.

- **Comments** - These are *Comments* that users post on the website. *Comments* are prioritized first since it's real time.

- **Updates** - *Updates* are internally used for the company. This are updates from 3rd party applications that are integrated.
- **Internal** - The *Support* account that replies/posts on the website is made-up by a team of people. This is where all replies/posts are saved to keep track on who relied/posted in a comment.

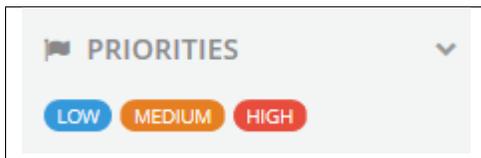

- **Account** - Where emails about administrative and financial matters are kept. This ticket's functions are for information and doesn't need anything to be done to it.
- **Messages** - This is where Emailed queries are saved.

**Note : In replying to an Email, the Ticket Number must be written as the subject of the Email.**

- **WordPress**
- **HTML/Javascripts**

## 2.3 Priorities

The filter *Priorities* of a ticket determine which tickets must be prioritised by how long it must be resolved. Tickets have 3 types of *Priorities*, the **Low, Medium, and High**.

- **Low**
- **Medium**
- **High**

## 2.4 Tags

The filter *Tags* of a ticket helps to identify where the ticket is connected/grouped. A ticket may have more than 1 tag.

## CHAPTER 3

---

### Macros

---

Automatic *Macros* are set to save time by automating common, repetitive tasks.

These *Macros* are set so that even without manually checking on the tickets, notifications and replies are sent automatically. This will make the users think that their queries are being observed.

NAME	DESCRIPTION
<a href="#">Envato Comments</a>	
<a href="#">Envato - our messages</a>	Filters internal messages and moves them to internal department
<a href="#">Awaiting reply status</a>	Set the status for ticket awaiting reply from user
<a href="#">Inactive ticket notification</a>	
<a href="#">Support Feedback</a>	
<a href="#">Envato Updates</a>	
<a href="#">Envato Account</a>	
<a href="#">Envato Messages</a>	
<a href="#">Operator leave</a>	Procedure to assign all the tickets to substitute operator

Inside these *Macros*, you can edit/set the information in which a specific *Macros* acts. The conditions under *Macro Conditions* must be met before the action of the *Macro* executes.

### Edit Macro

**Name**

**Description**

**Macro Type**

By default the macro has to be manually called in the ticket view. It can be set to be an automatic macro that is checked and actioned when new tickets are created. The actions will be performed automatically. A macro can only run once on a ticket automatically, there is no limit for running it manually.

#### Macro Conditions

Define the conditions for which tickets this macro will be available to. By default, with no conditions, it will apply to all tickets.

**Condition Group**

<input type="text" value="Hours since last reply"/>	<input type="text" value="Greater than"/>	<input type="text" value="168"/>
<input type="text" value="Last ticket replier"/>	<input type="text" value="Is"/>	<input type="text" value="Operator"/>

#### Macro Actions

Define actions that are performed out when a macro is carried out. Please ensure actions are valid for the department the ticket is in or else they will be ignored.

ACTION	VALUE
<input type="text" value="Send email to user"/>	<input type="text" value="Inactive ticket notification"/>

### 3.1 Email Templates

*Email Templates* are used the same as a *Macros*, it automatically send a preset Email to the users.

## Email Templates

+ Add Email Template

Showing 1 to 10 of 15 entries

It can be edited/created beforehand by setting all the needed information that the users might need.

The screenshot shows an email template editor. At the top, the language is set to "Default". Below that, the "Email Subject" field contains the text "RE: ({{{ ticket.number }}}) {{{ ticket.subject }}}". The "Email Content" field is a rich text editor with a toolbar containing icons for bold, italic, underline, link, list, table, and other formatting options. The content of the email is as follows:

Your ticket #{{{ ticket.number }}} has not been updated in the last 7 days. It will be automatically closed in the next 7 d

If you don't consider the ticket as resolved you can reply to this email above or review the ticket by going to: [{{{ ticket.frontend\\_url }}]({{{ ticket.frontend_url }}})

Kind Regards,  
{{{ system.company }}}

At the bottom of the editor is a "Preview" button.

An Email Template could be set to a Department to be sent to users. This template will become the default Email Template for this Department. This can be defined in General > Email Templates.

The screenshot shows the "Email Templates" configuration page. It has a title "Email Templates" and a subtitle: "You may select an email template other than the default to be sent to the user or operators for any of the actions below. This template will become the default for this department only." Below this, there are two columns of dropdown menus: "User Templates" and "Operator Templates".

User Templates		Operator Templates	
New Ticket Opened	Default	New Ticket Opened	Default
New Ticket Reply	Default	New Internal Ticket	Default
Reply to Locked Ticket	Default	User Ticket Reply	Default
Waiting for Response	Inactive ticket notification	Operator Ticket Reply	Default
Ticket Auto Closed	Default	New Ticket Note	Default
Closed By Operator	Disable	Assigned to Ticket	Default
Attachment Rejected	Default	Department Changed	Default

At the bottom left of the form is a "Submit" button.

## 3.2 Canned Responses

*Canned Responses* are predetermined responses to common questions. Rather than typing the same answers repeatedly, *Canned Responses* are used for efficiency and accuracy.

Responses		Tags
+ Add Canned Response Filter Results		
Show	10	entries
NAME		PUBLIC
<a href="#">Child Theme</a>	SUPPORT CHILD THEME	Yes
<a href="#">HTML not WP</a>	SUPPORT HTML TO WP	Yes
<a href="#">Incorrect credentials</a>	SUPPORT CREDENTIALS	Yes
<a href="#">Latest version of theme</a>	SUPPORT THEME UPDATE	Yes
<a href="#">Premium support</a>	PREMIUM	Yes

It can be set beforehand by adding a *Responses* and *Options* for the *Canned Response*.

### Responses

The canned response can be written in several languages. The appropriate response will be used automatically based on the user's language |

---

**Name** Latest version of theme

**Responses**

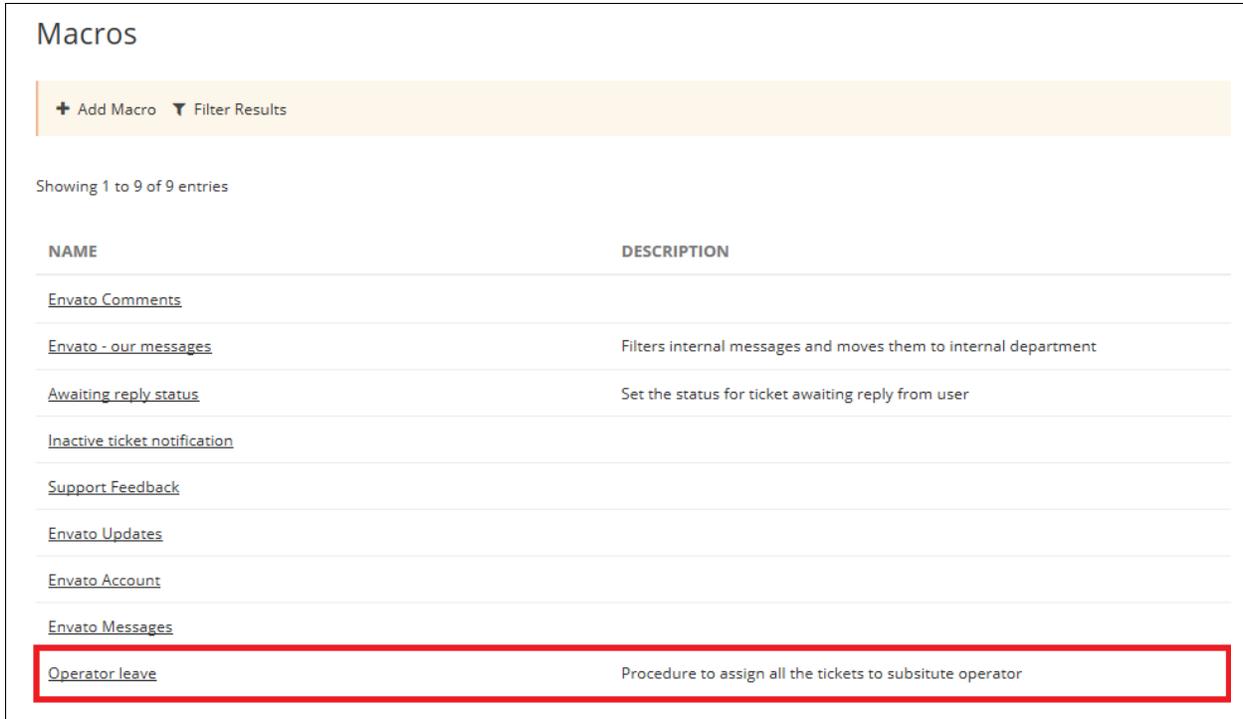

This problem should be fixed with the latest theme update. Please navigate to Appearance > Themes and mak  
 If you can see the update notification we recommend that you proceed with the update.  
 You can also update your theme manually - via FTP. Just download the latest theme files from 'Download' sect  
 information about FTP installation can be found in this article: <http://createit.support/knowledgebase/what-is-a->

Please let me know if you need any assistance with that.

Thank you.

### 3.3 Operator Leave

Under the *Macros*, *Operator Leave* is created so that if ever a support is not around, the tickets assigned to the said support won't be left unattended. With this *Macros* it will assign a support to a ticket that would meet its conditions.

The screenshot shows a web interface for managing macros. At the top, there is a header 'Macros' with two buttons: '+ Add Macro' and 'Filter Results'. Below this, it says 'Showing 1 to 9 of 9 entries'. A table lists the macros with columns for 'NAME' and 'DESCRIPTION'. The 'Operator leave' macro is highlighted with a red border.

NAME	DESCRIPTION
<a href="#">Envato Comments</a>	
<a href="#">Envato - our messages</a>	Filters internal messages and moves them to internal department
<a href="#">Awaiting reply status</a>	Set the status for ticket awaiting reply from user
<a href="#">Inactive ticket notification</a>	
<a href="#">Support Feedback</a>	
<a href="#">Envato Updates</a>	
<a href="#">Envato Account</a>	
<a href="#">Envato Messages</a>	
<a href="#">Operator leave</a>	Procedure to assign all the tickets to substitute operator

# CHAPTER 4

---

## Ticket Replies

---

Once a ticket is successfully made by a user, an Email is sent to notify the user of the ticket. The Email would have the *Ticket Number* and the *Ticket Subject* as the subject of the Email.

### 4.1 New Ticket Email

A new ticket will get an automatic notification to the user's Email. Within the Email, the *Ticket Details* are shown with a message to assure the user that the ticket was received by the support team.

Dear John Doe,

We have received your request and someone will be looking at it shortly. We are committed to resolving every ticket as promptly as possible, and we encourage you to let us know if you have any additional concerns or questions by replying to this email. You will receive an email when any action has been taken on your ticket.

---

**Ticket Details**

Ticket #: 1153992  
Subject: Sample  
Department: WordPress  
Status: Open  
Priority: Low

When a support replies to the ticket, a notification is sent in the Email for the reply. Users will also get a link to where the ticket is made.

Your ticket # 1153992 has been updated. You can reply to this email above or review the ticket by going to: <https://createit.support/helpdesk/en/tickets/view/1153992?token=841a99e426b9dc197de8bce42fea7914948>

## 4.2 Inactive Ticket Email

*Inactive Tickets* are tickets that have not been updated or its status has not changed from *Awaiting Reply* for 7 days. On the 7th day, an Email is sent to the user to notify the inactivity off the ticket. Information to make the ticket active again is also in the Email.

Language Default

Email Subject RE: (#{ ticket.number }) { ticket.subject }

Email Content

Your ticket #282381 has not been updated in the last 7 days. It will be automatically closed in the next 7 days.

If you don't consider the ticket as resolved you can reply to this email above or review the ticket by going to:  
<https://createit.support/helpdesk/en/tickets/view/282381?token=b2f343e55200f46702e2265d5ed985bca8eb6e67>

Kind Regards,

Editor

## 4.3 Ticket Closed Due to Inactivity Email

If the user doesn't make the ticket active, on the 8th day of inactivity, the ticket is automatically closed and an Email will be sent to the user notifying that the ticket is *Closed Due to Inactivity*.

<b>Email Content</b>	<p>-#-#- Please reply above this line -#-#-</p> <p>Dear Joe Bloggs,</p> <p>Your ticket has been closed automatically due to inactivity. If you do not believe that this issue has been adequately resolved, you may still reply and an operator will respond shortly. You can review the ticket by going to:</p> <p><a href="https://createit.support/helpdesk/en/tickets/view/2823817?token=b2f343e55200f46702e2265d5ed985bca8eb6e67">https://createit.support/helpdesk/en/tickets/view/2823817?token=b2f343e55200f46702e2265d5ed985bca8eb6e67</a></p>
----------------------	---

---

## Resolved Ticket

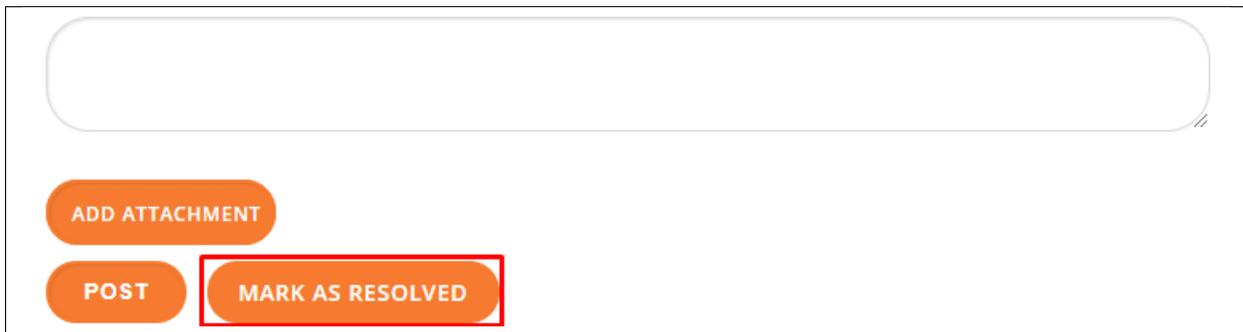

---

*Resolved Tickets* are tickets that have the status **Closed** since the concern/issue is already resolved.

For *Resolved Tickets*, there are 2 ways for its status to change:

### 5.1 Users

The *User* can decide if the concern/issue is already resolved and change the status of the ticket to *Closed*. To do this, the user should go to the *Ticket Details* page in [createIT](#) support website and click on the **Mark as Resolved** button.

The screenshot shows a user interface for a ticket. At the top is a large, empty rounded rectangular input field. Below it are three orange buttons: 'ADD ATTACHMENT', 'POST', and 'MARK AS RESOLVED'. The 'MARK AS RESOLVED' button is highlighted with a red rectangular border.

### 5.2 Operator

The *Operator* can change the status of a ticket inside the *Ticket Details*.

DEPARTMENT	WordPress
STATUS	Open
	Awaiting Reply
	In-Progress
PRIORITY	Closed

Once the status of a ticket is changed to *Closed*, the *User* will receive an Email to notify the *User* that the ticket was resolved.

**(#1153992) How do you rate the support?**

From	CreateItem
Down	j.modelo@createit.pl
Answer to	CreateItem
Date	Today 16:44

Dear Joy Sunday Modelo,

Your ticket # 1153992 was recently marked as resolved. We'd love to hear what you think about our customer service, please take a moment to choose one of the following options.

[Good, I'm satisfied](#)

[Bad, I'm unsatisfied](#)

You can review the ticket by going to:  
<http://createit.support/helpdesk/en/tickets/view/1153992?token=841a99e426b9dc197de8bce42fea79149482729d>

Kind Regards,  
createIT

Once the ticket's status is changed in the system, it will also change the status in [createIT](#) support website.
