2 Examples	5
2.1 Exhibit 0: Failing Code Block	5
2.2 Exhibit 1: Passing Code Block	5
2.3 Exhibit 2: Ignored Code Block	5
3 Testing File	7

A testing suite for documentation hosted on [Read the Docs](#) .

Contents:

CHAPTER 1

Usage

Exhibit 0: Failing Code Block

The following code block will be tested and raise an error:

```
one = 1
assert (one == 2)
```

Exhibit 1: Passing Code Block

The following code block will be tested and will not raise an error:

```
one = 1
assert (one == 1)
```

Exhibit 2: Ignored Code Block

The following code block will **NOT** be tested:

```
one = 1
assert (one == 2)
```

The block above is not tested because it has the *no-test* comment before it. If you were to look at the raw RST of the code-block above, it would look like:

```
..
   no-test
.. code-block...
```

CHAPTER 3

Testing File
