Release 0.3.3

Gildardo Adrian Maravilla Jacome

August 08, 2016

1	Installation	3
2	Apps	5
2.1	List of apps	5
3	Indices and tables	7
	Python Module Index	9

Apps that sound good together.

This is a set of apps for Django 1.8 and later.

Contents:

Installation

Arpeggio can be installed using pip

```
pip install arpeggio
```

Arpeggio contains a set of apps that can be used without dependency. The only exception is `arpeggio.core` which must be included always.

2.1 List of apps

2.1.1 Blog

The blog app contains the boilerplate code needed to create a basic blog

Models

```
class arpeggio.blog.models.Post(*args, **kwargs)
    Post Model.

    get_absolute_url()
        Get the absolute url of a post
```

Managers

```
class arpeggio.blog.managers.PostManager
    Post manager

    public()
        Filter the queryset to obtain the public posts.

    sticky()
        Filter the queryset to obtain the sticky posts.
```

Views

```
class arpeggio.blog.views.PostList(**kwargs)
    Post list view.

    model
        alias of Post

class arpeggio.blog.views.PostDetail(**kwargs)
    Post detail view.
```

model
alias of `Post`

2.1.2 Pages

The pages app contains logic to display pages from the database.

Models

```
class arpeggio.pages.models.Page(*args, **kwargs)
    Page model.

    get_absolute_url()
        Get the absolute url of a page
```

Views

```
class arpeggio.pages.views.PageDetail(**kwargs)
    Page detail view.

    model
        alias of Page
```

Indices and tables

- `genindex`
- `modindex`
- `search`

a

`arpeggio.blog`, 5
`arpeggio.pages`, 6

A

arpeggio.blog
 blog, 5
arpeggio.blog (module), 5
arpeggio.pages
 pages, 6
arpeggio.pages (module), 6

B

blog
 arpeggio.blog, 5

G

get_absolute_url() (arpeggio.blog.models.Post method), 5
get_absolute_url() (arpeggio.pages.models.Page method),
 6

M

model (arpeggio.blog.views.PostDetail attribute), 5
model (arpeggio.blog.views.PostList attribute), 5
model (arpeggio.pages.views.PageDetail attribute), 6

P

Page (class in arpeggio.pages.models), 6
PageDetail (class in arpeggio.pages.views), 6
pages
 arpeggio.pages, 6
Post (class in arpeggio.blog.models), 5
PostDetail (class in arpeggio.blog.views), 5
PostList (class in arpeggio.blog.views), 5
PostManager (class in arpeggio.blog.managers), 5
public() (arpeggio.blog.managers.PostManager method), 5

S

sticky() (arpeggio.blog.managers.PostManager method), 5
