Contents

Contents:

Authors

- Tiernan OToole

Installation

To install, download the lastest release from below and run

https://github.com/tiernano/b2uploader/releases

Usage

Get the source and build in Visual Studio (2013 and 2015 should work). using cmd line, go to the build folder and run a command as follows:

b2uploader –i accountid –a appkey –d directory_to_upload

where accountid and appkey are gotten from BackBlaze's site, and the directory is the folder you want uploaded
