1.2	ChatBot Class . . . . .	3
<b>2</b>	<b>Internals</b>	<b>5</b>

---

**Note:** The documentation could use some love. <3

---

### **Workflow**

The exact workflow of the ChatBot is as follows:

For every message from the user,

1. Initialize a chatbot with existing context (if any).
2. Get the response for a user message.
3. Serialize the chatbot and store that somewhere for passing to a new instance on the next initialization.

### **ChatBot Class**

## CHAPTER 2

---

### Internals
