CodeIgniter Admin is an Admin Panel for CodeIgniter - a toolkit - for people who build web sites using PHP. Its goal is to enable you to kickstart developing projects much faster than you could if you were writing code from scratch, by providing a basic admin backend.

CHAPTER 1

Release Information

This repo contains in-development code for future releases. To download the latest stable release please clone or download the repository

CHAPTER 2

Changelog and New Features

You can find a list of all changes for each release in the [user guide change log](#).

CHAPTER 3

Server Requirements

PHP version 5.6 or newer is recommended.
