## What is IFTTT?

---

[ifttt.com](https://ifttt.com) - If This Then That, also known as IFTTT (pronounced /ft/) - is a free web-based service to create chains of simple conditional statements, called applets. These applets can perform a configured action in response to a trigger. Triggers and actions are web services provided by platforms such as Facebook, Pinterest, Youtube, Spotify - and now, Plone sites.

Below are a few examples of IFTTT applets for better understanding:

- If a video is liked on Youtube, then save the video details in Evernote
- If a profile picture gets changed on Facebook, then update the same profile picture on Twitter
- If I'm tagged in a photo on Facebook, then save it to my phone gallery
- If I receive an email about a new Twitter follower in my Gmail inbox, then tweet the new follower a welcome message
- If NASA posts a new astronomy picture of the day, then add it to my screensaver gallery.
- Email me about Top Apps that have become FREE in the Apple App Store.
- Automatically unmute my Android phone when I get back home.
- Add a Spotify song from a liked YouTube Video.

**collective.ifttt** is an addon which enables any Plone site to play in the IFTTT ecosystem by allowing you to create IFTTT applets.

Below are a few examples of using IFTTT with Plone sites.

- If a news item is published, then tweet about it or post it on Facebook.
- If an event is published, then add it to my calendar.
- If new users sign up for an event, then add them to a Slack channel.
- If content changes, then record who edited it in a Google spreadsheet.

---

### Introduction to IFTTT Applets

---

#### 2.1 What is an Applet?

An Applet connects two or more apps or devices together. It enables you to do something that those apps or devices couldn't do on their own.

Applets are composed of triggers and actions. Triggers tell an Applet to start, and actions are the end result of an Applet run. To use an Applet, you'll need a [free IFTTT account](#). Then you need to connect your apps and devices to IFTTT.

Follow this [link](#) for easy creation of an IFTTT Applet.

---

# Enabling RSS Feeds On Plone Sites

---

## 3.1 Introduction

Plone can generate RSS feeds from folderish content types like folders and collections. First you must enable syndication on your site so that RSS feeds will be generated. Then you can go to the collection or folder you want to use as a feed and adjust its syndication settings.

If you want to aggregate a particular set of content to an RSS feed, you can create a collection content item for that purpose. You can choose what *content types* to aggregate and filter by fields such as *labels*, *dates*, *location* or *language*. Collections are language aware so this works correctly on multilingual sites.

Once you have an RSS feed you can use it on IFTTT without doing anything special. (No secret key, no IFTTT trigger needed.)

Below are the steps to create an example RSS Feed on a Plone site. You can tweak the configuration to meet your requirements and make different kinds of RSS feeds given the flexibility of collections.

## 3.2 Enabling Syndication

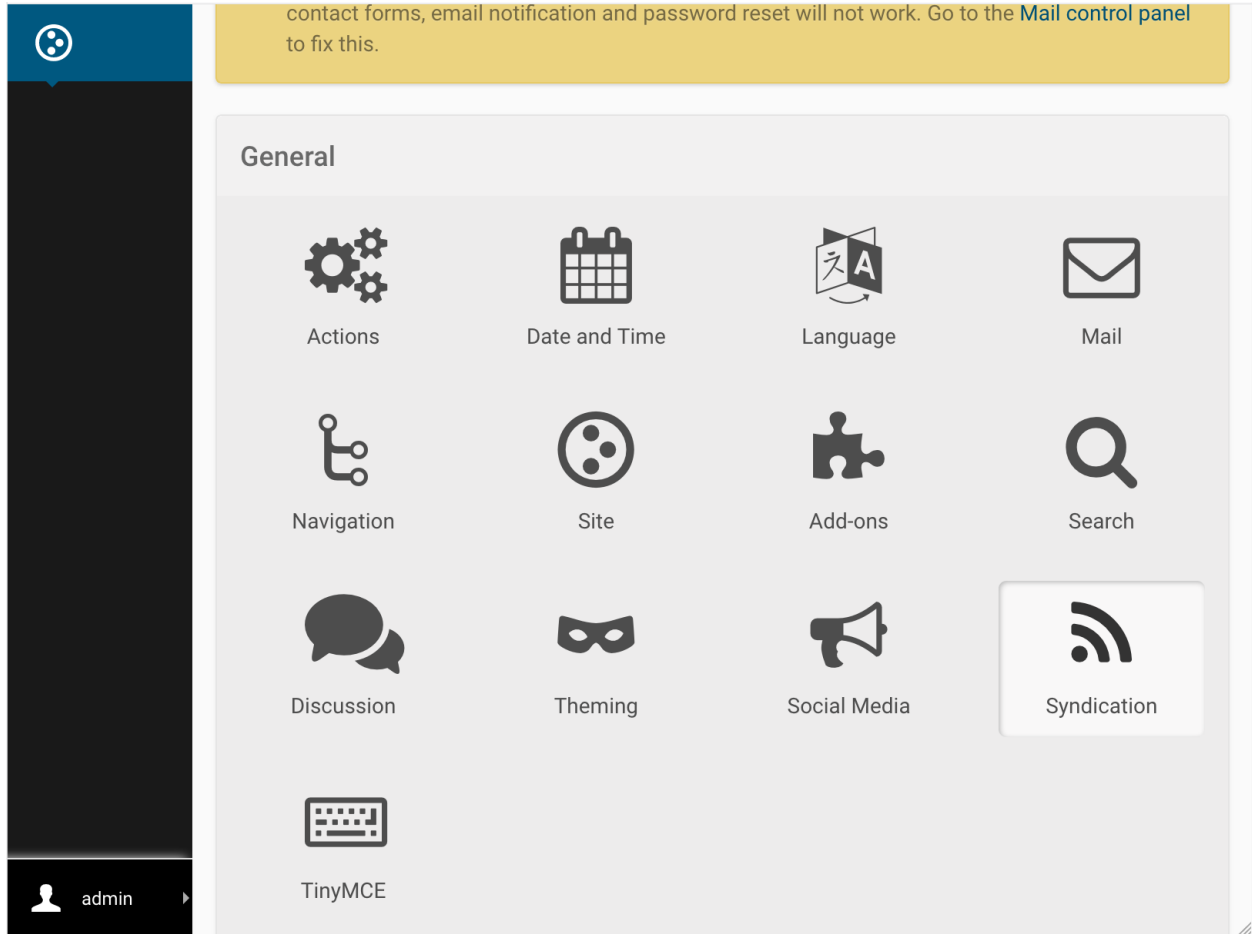

### *Step 1*

Go to Site Setup.

### Step 2

Select Syndication under General.

### Step 3

Select the following and save:

1. *Allowed*
2. *Search RSS enabled* (if you want to be able to use search results as feeds)
3. *Show settings button* (this will enable the *Syndication* tab on the edit bar of folders and collections)
4. *Show feed link* (this allows you to show an RSS link on the folder or collection)
5. *Save*

You may optionally include author information and adjust the maximum number of feed items.

☒ **Allowed** ● Allow syndication for collections and folders on site.

☐ **Enabled by default** ● If syndication should be enabled by default for all folders and collections.

☒ **Search RSS enabled** ● Allows users to subscribe to feeds of search results

☐ **Show author info** ● Should feeds include author information

☐ **Render Body** ● If body text available for item, render it, otherwise use description.

**Maximum items** ● Maximum number of items that will be syndicated.

**Allowed Feed Types** ● Separate view name and title by '|'

RSS|RSS 1.0  
rss.xml|RSS 2.0  
atom.xml|Atom  
itunes.xml|iTunes

**Site RSS** Paths to folders and collections to link to at the portal root.

☒ **Show settings button** ● Makes it possible to customize syndication settings for particular folders and collections

☒ **Show feed link** ● Enable RSS link document action on the syndication content item.

## 3.3 Creating a Collection to Use as an RSS Feed

### Step 1

Go to the site root. (This is a special type of object, so the Syndication tab will not show on the edit bar here, like it will on all other folders.)

Plone

☐ only in current section

Search Site

Home News Events Users

# Welcome!

[Learn more about Plone](#)

Home

## Welcome to Plone

**Congratulations! You have successfully installed Plone.**

If you're seeing this instead of the web site you were expecting, the owner of this web site has just installed Plone. Do not contact the Plone Team or the Plone support channels about this.

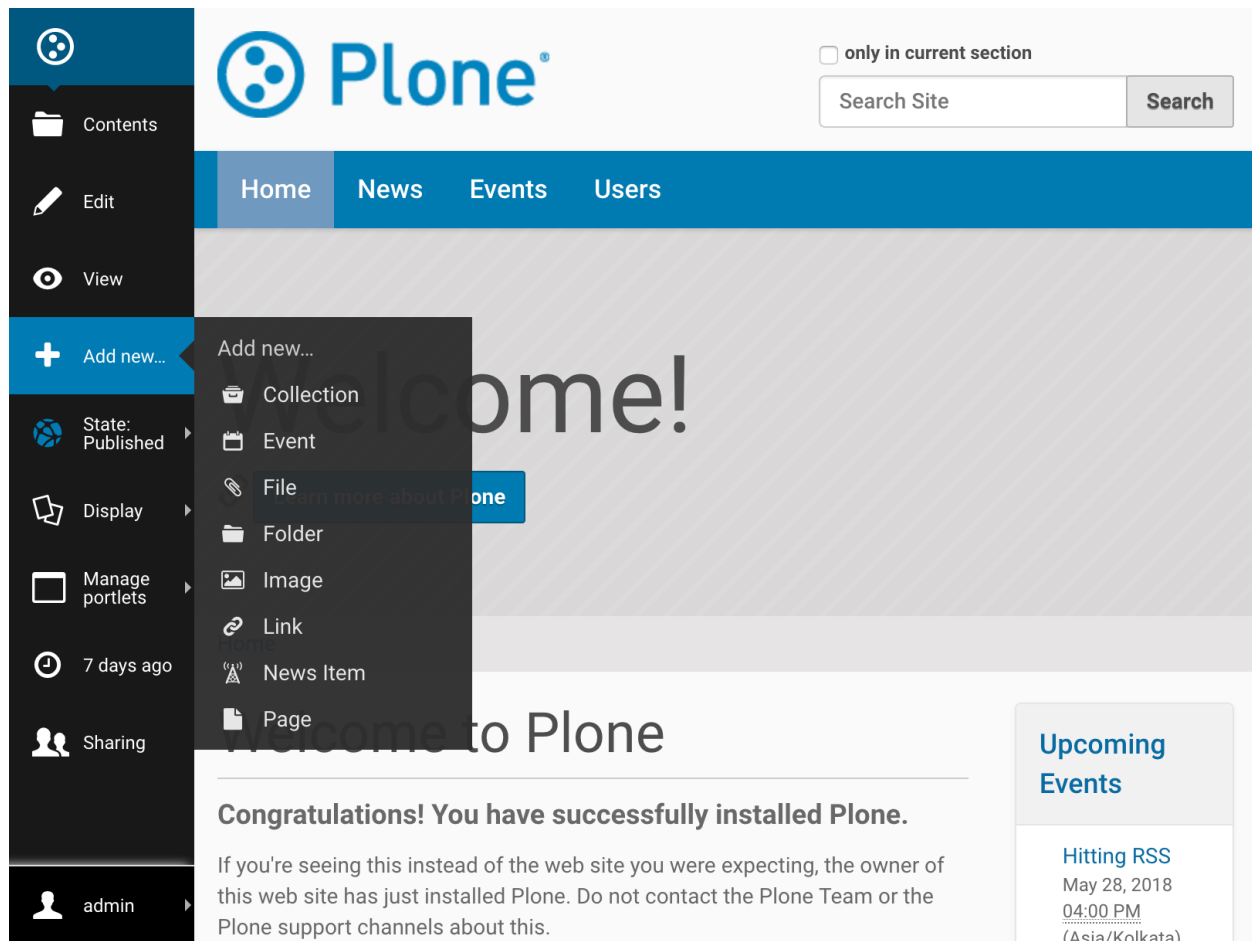

**Upcoming Events**

[Hitting RSS](#)

04:00 PM  
(Asia/Kolkata)

admin

*Step 2*

Add a new collection.

### Step 3

Configure your collection. The configuration explained below will aggregate all available published content. This can be tweaked to suit your own requirements.

1. Update `Title` to “Plone Site - RSS feed” or any other suitable name.
2. For `Select Criteria`, choose *Review State as Published*. (Otherwise unpublished items will show in your feed and people will get an error when they click on that URL.)
3. For `Sort On` choose *Effective date* and check `Reversed Order`.

## Add Collection

Default
Settings
Categorization
Dates
Ownership

**Title** •

Plone Site - Rss Feed

**Summary** *Used in item listings and search results.*

**Search terms** *Define the search terms for the items you want to list by choosing what to match on. The list of results will be dynamically updated*

✕ Review state

Matches any of ✕ Published [published]

✕ Select criteria

### News

Test Rss  
May 28, 2018

Movie Show this Tuesday  
May 21, 2018

Starboy Vs Khaleesi  
May 21, 2018

[More news...](#)

#### Step 4

On the Settings tab check `Exclude from navigation` if you want to make it disappear from the navigation tree. Save your new collection.

The screenshot shows the Plone web interface. At the top, there's a navigation bar with 'Home', 'News', 'Events', and 'Users'. Below this is a sub-header 'Home'. The main content area is titled 'Add Collection'. It features a tabbed interface with 'Default', 'Settings', 'Categorization', 'Dates', and 'Ownership'. The 'Default' tab is active. In this tab, there are three sections: 'Allow discussion' with a dropdown menu set to 'No value', 'Short name' with a text input field, and 'Exclude from navigation' which is checked. At the bottom of the form are 'Save' and 'Cancel' buttons. On the right side, there's a 'News' sidebar showing a list of news items: 'Test Rss' (May 28, 2018), 'Movie Show this Tuesday' (May 21, 2018), and 'Starboy Vs Khaleesi' (May 21, 2018), with a 'More news...' link at the bottom. The top right corner has a search bar and a checkbox for 'only in current section'. The bottom left corner shows the user 'admin'.

### Step 5

If the collection's content seems to be right, publish it using the `State` menu on the edit bar.

The screenshot shows the Plone CMS interface. The top navigation bar includes 'Home', 'News', 'Events', and 'Users'. The left sidebar has a 'State: Private' dropdown menu open, showing options like 'Publish', 'Submit for publication', and 'Advanced...'. The main content area is titled 'Plone Site - RSS feed' and displays a list of news items. The right sidebar shows a 'News' section with a 'More news...' link.

### 3.4 Viewing Your RSS Feed

#### Step 1

Your RSS feed can be viewed by appending `/RSS` to your collection's (or folder's) URL - something like `/path_to_collection/RSS`. (Note that this is case sensitive, `/rss` will not work.) For our example the URL to the RSS feed is `http://localhost:8080/Plone/plone-site-rss-feed/RSS`

### Step 2

To show a link to the RSS feed on a collection or folder, enable it on the edit bar's Syndication tab as shown below. This is an optional step - many sites choose not to show these feed links because it might confuse their users.

The screenshot shows the 'Syndication Properties' configuration page. On the left is a dark sidebar with navigation icons and labels: Contents, Edit, View, Add new..., State: Published, Actions, Display, Manage portlets, an hour ago, and a user profile for 'admin'. The main content area has a light gray background. At the top left of this area is a list of items: 'Movie Show this Tuesday', 'New beginnings', 'Starboy Vs Khaleesi', and 'Test Rss'. The central title 'Syndication Properties' is in large black font. Below it, a paragraph explains that syndication enables synchronization with other websites. A toggle switch is set to 'Enabled'. Under 'Feed Types', a box labeled 'iTunes' has arrows pointing to a box containing 'RSS 1.0', 'RSS 2.0', and 'Atom'. Below this, there is an unchecked checkbox for 'Render Body' with a description, and a 'Maximum items' field set to '15'. A 'Save' button is at the bottom. On the right, a 'News' sidebar lists recent items: 'Test Rss' (May 28, 2018), 'Movie Show this Tuesday' (May 21, 2018), and 'Starboy Vs Khaleesi' (May 21, 2018), with a 'More news...' link.

Now your RSS feed is ready to be used in an IFTTT applet. You can test it by copy-pasting the RSS URL into an RSS Reader, like [feeder.co](http://feeder.co) or [Mozilla Reader](http://mozillareader.com).

---

### Using Plone RSS Feeds in IFTTT Applets

---

To learn how to create an IFTTT applet using an RSS feed, follow the demonstration below.

This applet will add a new row on Google Spreadsheet each time an RSS Feed get publishes. However, one may teak this configuration based on user requirement.

---

- Signup at [free IFTTT account](#).
- Navigate to your Username in the upper right corner
- Select **New Applet** from the dropdown menu
- Click the blue 'this' text
- Search `rss` in search box. And select `RSS Feed`

**IFTTT**  Discover  Search  My Applets  Activity — agrawalshriyansh05 ▾

[< Back](#)

## Choose a service

Step 1 of 6

 rss

RSS Feed

[About](#) [Blog](#) [Help](#) [Jobs](#) [Terms](#) [Privacy](#) [Trust](#)

Build your own service and Applets

- Choose *New feed item*
- Fill RSS feed url in the given space. And click *Create Trigger*

**IFTTT** Discover Search My Applets Activity agrawalshriyansh05 ▾

[< Back](#)

## Complete trigger fields

Step 2 of 6

### New feed item

This Trigger fires every time a new item is added to the feed you specify.

Feed URL

`http://timesofindia.indiatimes.com/rssfeedstopstories.cms`

for feed URL requirements, visit the [help page](#)

**Create trigger**

[About](#) [Blog](#) [Help](#) [Jobs](#) [Terms](#) [Privacy](#) [Trust](#)

Build your own service and Applets

- Click the blue 'that' text
- Choose *Google Sheets* as Action Service

- Choose *Add row to spreadsheet*
- Configure the form based on required tweaks and hit *Create Action*

## Add row to spreadsheet

This action will add a single row to the bottom of the first worksheet of a spreadsheet you specify. Note: a new spreadsheet is created after 2000 rows.

### Spreadsheet name

New feed item

Will create a new spreadsheet if one with this title doesn't exist

Add ingredient

### Formatted row

EntryPublished ||| EntryTitle |||  
EntryUrl ||| EntryContent |||  
FeedTitle ||| FeedUrl

Use "|||" to separate cells

Add ingredient

### Drive folder path

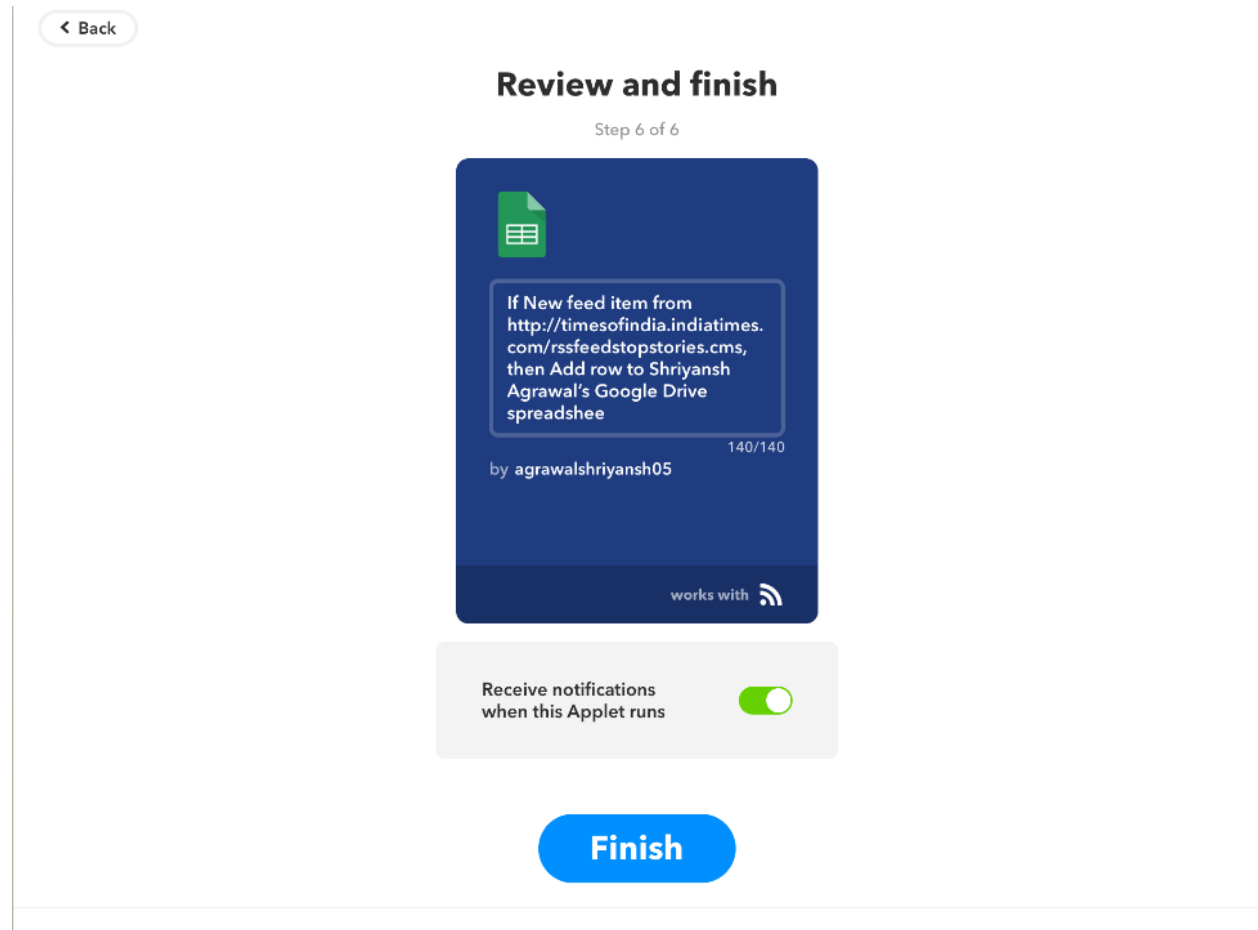

IFTTT/Feed/ FeedTitle

Format: some/folder/path  
(defaults to "IFTTT")

Add ingredient

Create action

- Click *Finish*

Hurrah!! We successfully created our IFTTT Applet.

My Applets > Google Sheets

Now Every time an RSS get publishes, it will automatically be added as a new row to our Google Spreadsheet.

### Configuring a Plone Site with an IFTTT Secret Key

---

IFTTT supports push notification, which can be leveraged to get instant notifications from a Plone site. To do that you need to configure the Plone site with your IFTTT secret key.

Follow the steps below to get your IFTTT secret key and save it in your Plone site.

#### 5.1 Obtaining an IFTTT Secret Key

1. Go to [ifttt.com](https://ifttt.com) and sign up for an account.
2. At the top click on 'Search' and find 'Maker'. (Update: this is now named 'Webhook'.)

 maker

## Services

## Applets

3. Click the 'Connect' button to create a Maker (Webhook) channel.

4. Click on the gear icon (Settings) on the top-right of the Maker (Webhook) channel to view your key.

## Account Info

Connected as: [REDACTED]

URL: <https://maker.ifttt.com/use/bWs5lMeYu4KFBakuDxGKzW>

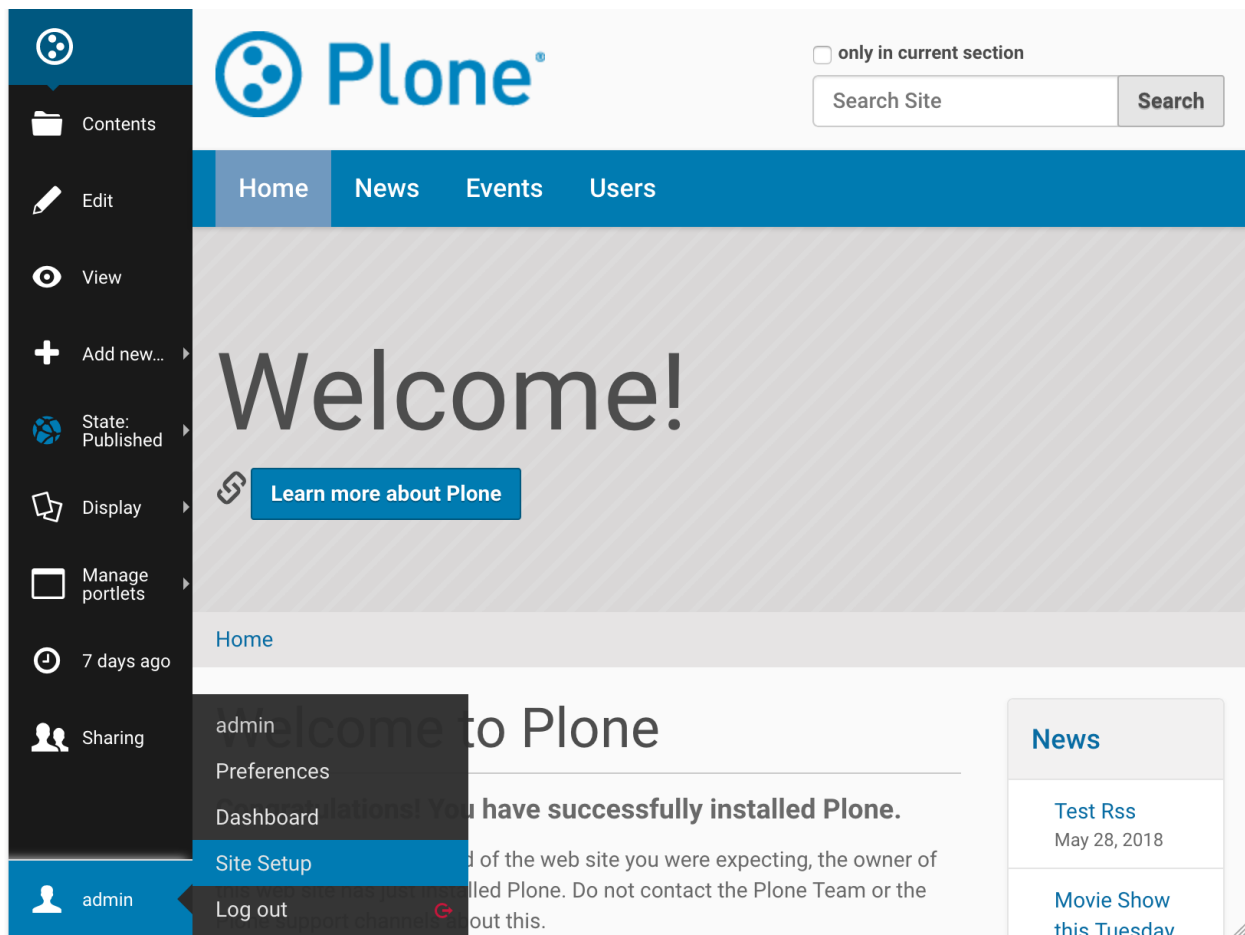

Status: **active**

**This is your key**

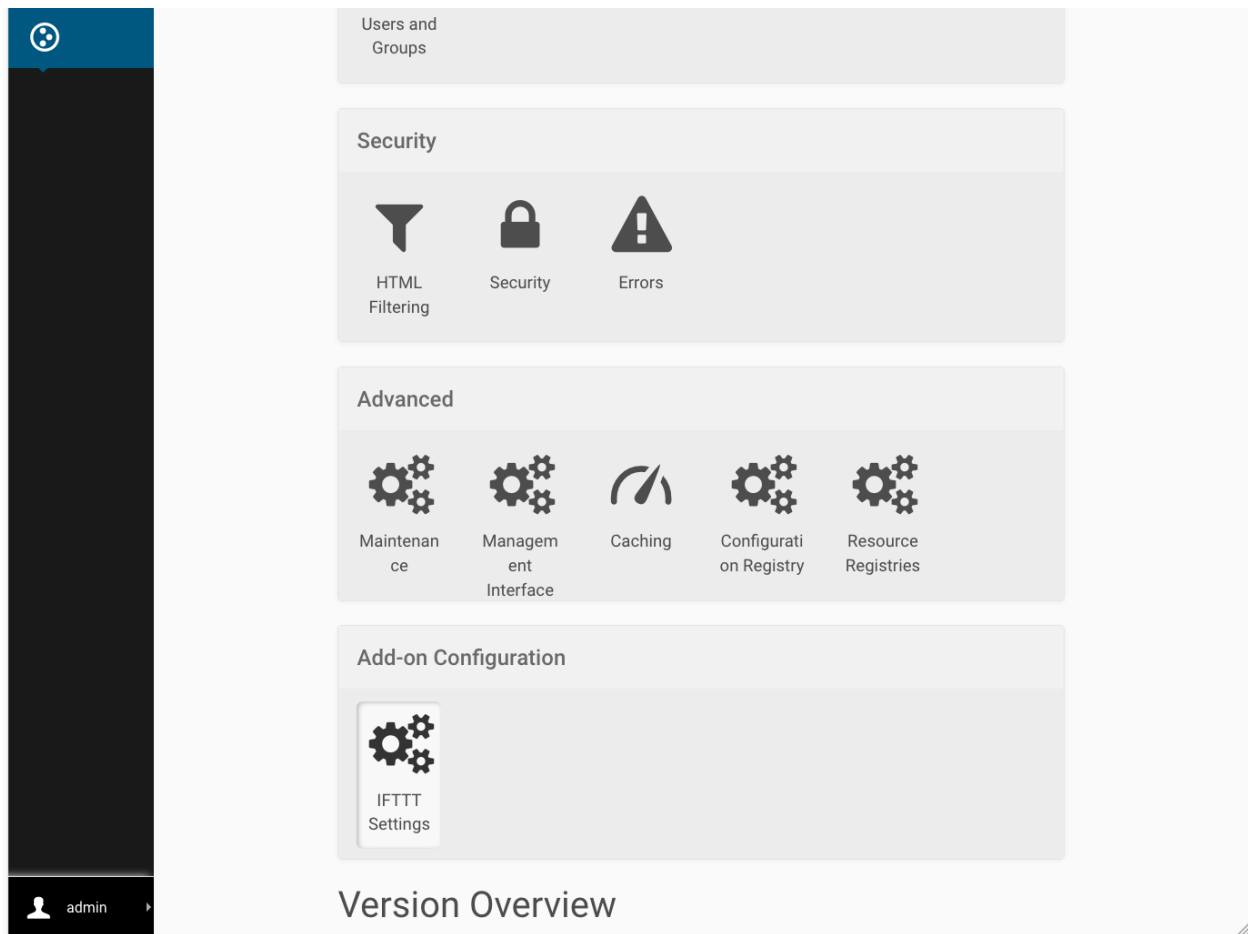

[Edit connection](#)

## 5.2 Saving an IFTTT Secret Key in Plone

1. Go to Site Setup

2. Select IFTTT Settings under *Add-on Configuration*

3. Copy your key to the Secret Key field and click Save.

The screenshot shows the Plone web interface. At the top, there's a navigation bar with 'Home', 'News', 'Events', and 'Users'. Below this is a 'Home' breadcrumb. The main content area is titled 'IFTTT Settings' and includes a 'Site Setup' button. A 'Secret Key' field is visible, containing the value 'bWs5IMeYu4KFBakuDxGKzW'. To the right, a sidebar lists various site settings like 'General', 'Actions', 'Date and Time', 'Language', 'Mail', 'Navigation', 'Site', 'Add-ons', 'Search', 'Discussion', 'Theming', 'Social Media', 'Syndication', and 'TinyMCE'. The bottom left shows the user 'admin' is logged in.

### Trigger IFTTT Action

---

**Plone Content Rules** are a powerful mechanism to automate dealing with content using *conditions* and *actions*. It will automatically perform an action when certain events (known as “triggers”) takes place under desired condition.

**Collective.ifttt** contains a new content rule action, *IFTTT Trigger*, that posts an event to the IFTTT web service when a content rule’s conditions are satisfied.

Content rules with the *IFTTT Trigger* is used to implement the IFTTT triggers, which is a powerful mechanism to automate dealing with 3rd party web services that collective.ifttt provides (Content Trigger, Event Trigger, etc.)

You can create your own custom IFTTT trigger event by combining the *IFTTT Trigger* content rule action with your own conditions

## 6.1 Creating and Defining Content Rules

Following the instructions given on the Plone documentation [link](#). Create a content rule as follows and assign it to a folder on your site (or at the site root):

- Triggering event: Object modified
- Condition: Content type equals News Item
- Action: Select “IFTTT Trigger” from the drop down menu and click on the “Add” button.

**Edit content rule**

[Up to rule management](#)

Rules execute when a triggering event occurs. Rule actions will only be invoked if all the rule's conditions are met. You can add new actions and conditions using the buttons below.

If all of the following conditions are met: Perform the following actions:

**Content type** Content types are: News Item

**Warning** There is not any action performed by this rule. Click on Add button to setup an action.

**Add condition**

Content type [Add](#)

**Add action**

- ✓ Logger
- Notify user
- Copy to folder
- Move to folder
- Delete object
- Transition workflow state
- Send email
- IFTTT Trigger**

**Assignments**

**Info** This rule is assigned to this content type. This will not trigger IFTTT.

**Configure rule**

**Site Setup**

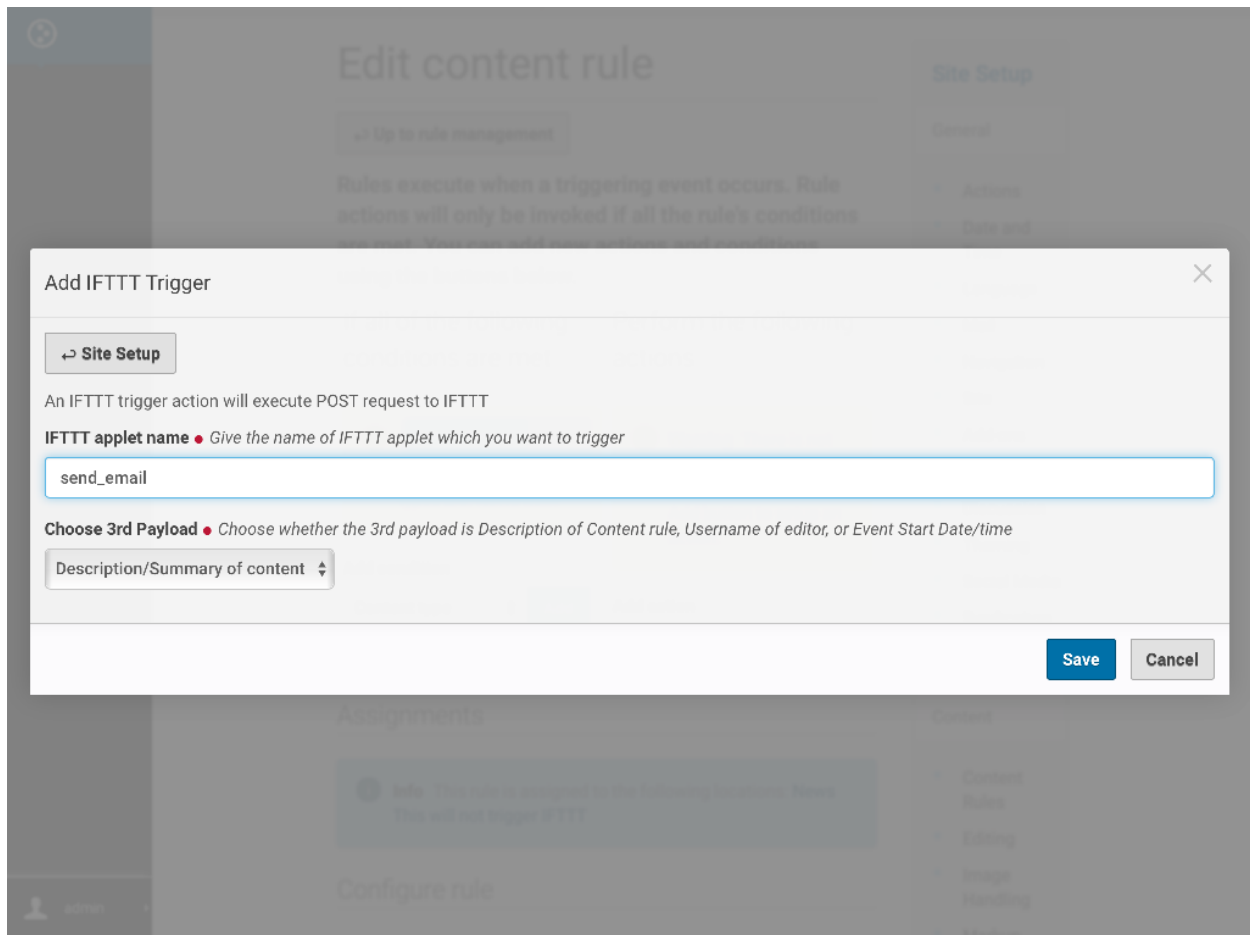

General

- Actions
- Date and Time
- Language
- Mail
- Navigation
- Site
- Add-ons
- Search
- Discussion
- Theming
- Social Media
- Syndication
- TinyMCE

**Content**

- Content Rules
- Editing
- Image Handling
- Markup

- From the “Add IFTTT Trigger” page, fill out the form:
- For the “IFTTT applet name” enter: the IFTTT applet which you want to trigger.
- Choose the 3rd payload from available options (values of which will be dynamically fetched from the content which trigger this action) :
  - description - Description/Summary of content
  - username - Username of Editor
  - start - Event Start Date/Time
- Click the “Save” button.

### 6.1.1 Data sent to IFTTT applet

In the data sent to IFTTT, following payload (values) will be dynamically included (for which content on the site this content rule triggers):

- Title
- absolute\_url
- Chosen 3rd Payload

## 6.2 Working example of IFTTT Trigger

Now that following the [Plone Content Rule](#) we can see *IFTTT Trigger* in action.

For example, below we will create a new *news item* and further update it's content to trigger IFTTT `send_email` applet.

### 6.2.1 Create news item

- Select Add new - news item

The screenshot shows the Plone CMS interface. The top navigation bar includes 'Home', 'News', 'Events', and 'Users'. The 'News' section is active, displaying a list of news items. The left sidebar contains various management tools. The main content area shows the details of the selected news item, 'test trigger for ifttt', including its author (admin), last modified date (Jun 09, 2018), and a 'Read More...' link. A sidebar on the right lists other news items.

- Fill in form for new news. And click save.

The screenshot displays the Plone 'Add News Item' form. The top navigation bar includes 'Home', 'News', 'Events', and 'Users'. The left sidebar contains links to 'Movie Show this Tuesday', 'New beginnings', 'Starboy Vs Khaleesi', 'Test Rss', and 'test trigger for ifttt'. The main content area has tabs for 'Default', 'Categorization', 'Dates', and 'Ownership'. The 'Default' tab is selected, showing the following fields:

- Title**: This should not trigger Ifttt Trigger Action
- Summary**: Used in item listings and search results. This is a creation of news item which is why it will not trigger Ifttt
- Text**: A rich text editor with a toolbar containing options like Insert, Format, Edit, Table, Tools, View, and various text formatting icons.

A right sidebar titled 'News' lists existing items: 'test trigger for ifttt' (Jun 08, 2018), 'New beginnings' (May 31, 2018), 'Test Rss' (May 28, 2018), 'Movie Show this Tuesday' (May 21, 2018), 'Starboy Vs Khaleesi' (May 21, 2018), and a 'More news...' link.

### 6.2.2 Update news item

- Select Edit for news item.

The screenshot shows the Plone CMS interface. On the left is a dark sidebar with navigation icons and labels: Contents, Edit, View, State: Private, Actions, Manage portlets, a few seconds ago, Sharing, and Rules. The top header features the Plone logo, a search bar with the text 'Search Site' and a 'Search' button, and a checkbox labeled 'only in current section'. Below the header is a blue navigation bar with links for Home, News, Events, and Users. The main content area has a breadcrumb trail: Home > News > This should not trigger Ifttt Trigger Action. The central content displays a news item with the title 'This should not trigger Ifttt Trigger Action' and the text 'This is a creation of news item which is why it will not trigger Ifttt'. To the left of the main content is a list of recent news items: 'Movie Show this Tuesday', 'New beginnings', 'Starboy Vs Khaleesi', 'Test Rss', and 'test trigger for ifttt'. To the right is a 'News' sidebar listing the same items with their dates. At the bottom, a footer contains the text: 'The Plone® Open Source CMS/WCM is © 2000-2018 by the Plone Foundation and friends. Distributed under the GNU GPL license.' and links for Site Map, Accessibility, Contact, and Powered by Plone & Python.

- Update news item. And click save.

The screenshot displays the Plone web interface for editing a news item. The top navigation bar includes 'Home', 'News', 'Events', and 'Users'. A search bar is located in the top right corner. The left sidebar contains various site management tools like 'Contents', 'Edit', 'View', 'State: Private', 'Actions', 'Manage portlets', '3 minutes ago', 'Sharing', and 'Rules'. The main content area is titled 'Edit News Item' and features a central form with tabs for 'Default', 'Categorization', 'Dates', 'Ownership', and 'Settings'. The 'Title' field contains 'This should trigger IFTTT'. The 'Summary' field contains 'Used in item listings and search results.' The 'Text' field contains 'This is updated news item which is why IFTTT applet (send\_email) got triggered.' To the right of the main form is a 'News' sidebar showing a list of recent news items: 'Test Rss' (May 28, 2018), 'Movie Show this Tuesday' (May 21, 2018), and 'Starboy Vs Khaleesi' (May 21, 2018). A 'More news...' link is at the bottom of this list. On the left side of the main form, there are two red text boxes: 'This should trigger IFTTT Applet' and 'This will not trigger IFTTT'.

## 6.2.3 Triggered the IFTTT Applet

The screenshot displays the Plone web interface. At the top, the Plone logo is visible, along with a search bar and a checkbox labeled "only in current section". Below the logo, there is a navigation bar with tabs for Home, News, Events, and Users. The "News" tab is currently selected. A breadcrumb trail shows the path: Home > News > This should trigger IFTTT. Two blue information boxes are present: the first states "Info Successfully triggered the IFTTT applet send\_email" and the second states "Info Changes saved". The main content area features a large heading "This should trigger IFTTT" and a subheading "This is updated news item which is why IFTTT applet (send\_email) got triggered." To the left of this text is a vertical list of news items: "Movie Show this Tuesday", "Starboy Vs Khaleesi", "Test Rss", "This should trigger IFTTT" (highlighted in red), and "This will not trigger IFTTT" (highlighted in red). To the right is a "News" sidebar with a list of items: "Test Rss" (May 28, 2018), "Movie Show this Tuesday" (May 21, 2018), "Starboy Vs Khaleesi" (May 21, 2018), and a "More news..." link. The left sidebar contains various icons and labels: Contents, Edit, View, State: Private, Actions, Manage portlets, a few seconds ago, Sharing, and Rules. The bottom of the left sidebar shows the user "admin".
