Release 3.0.1

Piper Merriam

Oct 18, 2019

Contents

1 Contents 3

2 Indices and tables 5

computable.py is a python library for interacting with the Computable protocol.

CHAPTER 1

Contents

1.1 Quickstart

- *Installation*

Note: All code starting with a `$` is meant to run on your terminal. All code starting with a `>>>` is meant to run in a python interpreter, like ipython.

1.1.1 Installation

computable.py can be installed (preferably in a virtual environment) using `pip` as follows:

```
$ pip install computable --extra-index-url https://test.pypi.org/simple
```

Installation from source can be done from the root of the project with the following command.

```
$ pip install .
```

CHAPTER 2
