CHAPTER 1

Getting started

If you're looking to contribute to the development of Cambridge South Hockey Club's website, this is the place to start!

1.1 Installation

1.1.1 Pre-requisites

1.2 Editor Support

Whilst you're free to use any code editor you like, its strongly recommended that you use [VS Code](#).

The repository includes [workspace settings for VS Code](#). Some of these settings relate to the VS Code extensions listed below. Its highly recommended that you install these extensions to ensure the same coding standards are maintained by all contributors.

Python Linting, Debugging (multi-threaded, remote), Intellisense, code formatting, refactoring, unit tests, snippets, Data Science (with Jupyter), PySpark and more.

Django Template Django template language support

Babel ES6/ES7 Adds JS Babel es6/es7 syntax highlighting

ESLint Integrates ESLint into VS Code

Flow Language Support Flow support for VS Code

Prettier - JavaScript formatter VS Code plugin for prettier

restructuredText Edit reStructuredText (RST, ReST) with accurate live preview

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
