CHAPTER 1

Welcome to Data Guidelines's documentation!

2.1 Whole-genome sequencing (human)

Person responsible for content in subsections: xxx

2.1.1 Facilities in SciLifeLab providing services within this field:

- NGI

2.1.2 Data formats and standards in the field:

2.1.3 Experimental design suggestions

2.1.4 Recommended analysis pipelines?

2.1.5 Data storage and backup?

2.1.6 Data publishing and archiving in the field(repositories):

2.2 RNA sequencing

Person responsible for content in subsections: xxx

2.2.1 Facilities in SciLifeLab providing services within this field:

- NGI

2.2.2 Data formats and standards in the field:

2.2.3 Experimental design suggestions

2.2.4 Recommended analysis pipelines?

2.2.5 Data storage and backup?

2.2.6 Data publishing and archiving in the field(repositories):

2.3 Single cell

Person responsible for content in subsections: xxx

2.3.1 Facilities in SciLifeLab providing services within this field:

- NGI

2.3.2 Data formats and standards in the field:

2.3.3 Experimental design suggestions

2.3.4 Recommended analysis pipelines?

2.3.5 Data storage and backup?

2.3.6 Data publishing and archiving in the field(repositories):

2.4 Epigenetics

Person responsible for content in subsections: xxx

2.4.1 Facilities in SciLifeLab providing services within this field:

- NGI

2.4.2 Data formats and standards in the field:

2.4.3 Experimental design suggestions

2.4.4 Recommended analysis pipelines?

2.4.5 Data storage and backup?

2.4.6 Data publishing and archiving in the field(repositories):

2.5 De novo genome sequencing

Person responsible for content in subsections: xxx

2.5.1 Facilities in SciLifeLab providing services within this field:

- [NGI](#)

2.5.2 Data formats and standards in the field:

2.5.3 Experimental design suggestions

2.5.4 Recommended analysis pipelines?

2.5.5 Data storage and backup?

2.5.6 Data publishing and archiving in the field(repositories):

2.6 Metagenomics

Person responsible for content in subsections: xxx

2.6.1 Facilities in SciLifeLab providing services within this field:

- [NGI](#)

2.6.2 Data formats and standards in the field:

2.6.3 Experimental design suggestions

2.6.4 Recommended analysis pipelines?

2.6.5 Data storage and backup?

2.6.6 Data publishing and archiving in the field(repositories):

CHAPTER 3

Proteomics

3.1 Proteomics

CHAPTER 4

Metabolomics

4.1 Metabolomics

CHAPTER 5

Imaging

5.1 Imaging

CHAPTER 6

Indices and tables

- `genindex`
- `modindex`
- `search`
