Python package `distcontrib` contributes utility functions to `setuptools`, since `distribute` is now deprecated.

CHAPTER 1

List of functions

zap

Cleans more files than `clean` does, including Eclipse project files, Netbeans project files, IDEA project files, *.egg and *.egg-info.

doctest

Runs doctests

psql

Creates a database on a PostgreSQL server.

migrate

Runs `migrate` (from `sqlalchemy-migrate`) as part of your build.

CHAPTER 2

Example

```
$ python setup.py zap
```

CHAPTER 3
