PROJECT-NAME Documentation

Release 0.1

Author

Sep 27, 2017

Contents

1 Testing app development on a current project **3**
- 1.1 Installation . . . 3
- 1.2 Usage . . . 3
- 1.3 ChangeLog . . . 3

2 Indices and tables **5**

This is a skeleton template for a django reusable app which will be distributeed by setup tools.

CHAPTER 1

Testing app development on a current project

You can also create a symlink to the app in your current project until the app has been completed, then just remove it and install the app with `setup.py install`

Contents:

Installation

- run `python test-initdev.py` to run tests
- run `python initdev.py` to run the main script
- cd to the project destination directory that was created
- run `django-admin.py startapp appname` to create the app inside the new created directory

Usage

Using this application

ChangeLog

0.1.2 - 01/03/2013

- bugfix setup.py template

0.1.1 - 01/02/2013

- On completion, a Reminder to update the MANIFEST.in file :)

0.1 - 01/02/2013

- Initial release
- Simple copy script with no logic, just copies the files
- Copies src/docs, setup.py, MANIFEST.in, and README.md
- Add project name to the README.md file

CHAPTER 2

Indices and tables

- genindex
- modindex
- search
