# **django-board Documentation**

***Release 0.2.0***

**Dominic Rodger**

January 03, 2016

<b>1</b>	<b>Getting started</b>	<b>3</b>
<b>2</b>	<b>Running the tests</b>	<b>5</b>

A pluggable Django app for managing board members of an organisation. Board members have titles, mini-biographies, and photos.

Installation is simple:

```
pip install django-board
```

---

## Getting started

---

Add the following to your `INSTALLED_APPS`:

- `sorl.thumbnail` (if not already present);
- `board`.

Sync database changes, using:

```
python manage.py syncdb
```

`django-board` ships with no views, templates or URLs. To include a list of board members in a template, use the template tag `board_members`:

```
{% load board_tags %}
{% board_members as members %}

{% if members %}
<ul>
  {% for member in members %}
    <li>{{ member.name }}</li>
  {% endfor %}
</ul>
{% endif %}
```

---

## Running the tests

---

You can run the test suite using:

```
python manage.py test board
```
