
Django DB Shell Plus Documentation

Release 1.0.1

Simon Percivall

August 12, 2015

1	Contents:	1
1.1	Installation	1
1.2	Usage	1
1.3	Contributing	1
1.4	Credits	2
1.5	History	3
2	Indices and tables	5

Contents:

1.1 Installation

At the command line:

```
$ pip install django_dbshell_plus
```

1.2 Usage

Add *django_dbshell_plus* to installed apps in *settings.py*, then run:

```
> ./manage.py dbshell_plus
```

1.3 Contributing

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given.

You can contribute in many ways:

1.3.1 Types of Contributions

Report Bugs

Report bugs at <https://github.com/simonpercival/django-dbshell-plus>.

If you are reporting a bug, please include:

- Any details about your local setup that might be helpful in troubleshooting.
- Detailed steps to reproduce the bug.

Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

Write Documentation

Django DB Shell Plus could always use more documentation, whether as part of the official Django DB Shell Plus docs, in docstrings, or even on the web in blog posts, articles, and such.

Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/simonpercivall/django-dbshell-plus/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

1.3.2 Get Started!

Ready to contribute? Here’s how to set up *django_dbshell_plus* for local development.

1. Check out the repository.
5. When you’re done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 django_dbshell_plus
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit and send the patch or create a pull request.

1.3.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.7, and 3.3.

1.4 Credits

- Simon Percivall <percivall@gmail.com>

1.5 History

1.5.1 1.0.1

Released: 2015-08-12

- **[general]** Initial version, use *pgcli* or *mycli* when available. [¶](#)

Indices and tables

- `genindex`
- `modindex`
- `search`
