2	Installation	5
3	Tutorial	7
4	Indices and tables	9

Contents:

Django Dynamic Sprites

Version 0.1.3

A way to generate sprites based on objects created by the application user.

Installation

Install the package via pip:

```
$ pip install django-dynamic-sprites
```

Notes:

- – make sure you have pip installed.
- – use virtualenv for the sake of a nice development environment.

Tutorial

Before starting, make sure Django Dynamic Sprites is *Installation*.
