
django-mksuperuser Documentation

Release latest

June 14, 2015

1	Installation	3
----------	---------------------	----------

Django app for lazy people. Creates superuser with no fuss.

login admin

password admin

Installation

Install from pip:

```
pip install django-mksuperuser
```

Add package to `INSTALLED_APPS`:

```
INSTALLED_APPS += ('django_mksuperuser',)
```

When you create new Django project and syncdb or migrate (depending on version) new admin user is created with login 'admin' and password 'admin'. For all the lazy people!:

```
Django 1.7 > python manage.py migrate  
Django 1.7 < python manage.py syncdb --noinput
```
