3.9	1.1	6
3.10	1.0	6

CHAPTER 1

Plugin weather

Purpose

The weather plugin uses the online service [Yahoo! Weather](#) to grab weather informations.

Dependencies

There is no dependency.

Plugin configuration

There is no global configuration options for this plugin.

Create the domogik devices

Domogik device type : weather.weather

1 parameter is needed for a domogik device creation:

Key	Type	Description
device	string	The location code for your city. Example for Paris : 615702

To find the location code for your city, just go on <https://weather.yahoo.com/> . Then, search for your town. You will be redirected to a new page with an url like this : <https://weather.yahoo.com/france/%C3%AEle-de-france/paris-615702/> (for Paris). The last part of the url, after the “-” (minus) is the location code. In our example, the location code for Paris is 615702.

Start the plugin

You can now start the plugin (start button) and use the created domogik devices.

Set up your widgets on the user interface

You can now place the widgets of your devices features on the user interface.

Development informations

Sensors history

Most of the sensors for this plugin have no history enabled by default. For example forecast data have no history as there is no need to keep forecast history!

Only the following sensors are configured to store the history:

- current_barometer_value
- current_humidity
- current_temperature
- current_wind_direction
- current_wind_gust
- current_wind_speed

Timeout on sensors

All sensors have a timeout set to 65 minutes : as the interval between each check on weather.com is set to 30 min, we let the plugin to encounter 1 failure.

Condition codes

Condition codes and texts are listed here: <https://developer.yahoo.com/weather/documentation.html>

You can find some code to translate the condition codes to css class for a weather css icon library here : <https://gist.github.com/aloncarmel/8575527>

Here are some translated values...

English

```
{ 0 : "tornado", 1 : "tropical storm", 2 : "hurricane", 3 : "severe thunderstorms", 4 : "thunderstorms", 5 : "mixed rain and snow", 6 : "mixed rain and sleet", 7 : "mixed snow and sleet", 8 : "freezing drizzle", 9 : "drizzle", 10 : "freezing rain", 11 : "showers", 12 : "showers", 13 : "snow flurries", 14 : "light snow showers", 15 : "blowing snow", 16 : "snow", 17 : "hail", 18 : "sleet", 19 : "dust", 20 : "foggy", 21 : "haze", 22 : "smoky", 23 : "blustery", 24 : "windy", 25 : "cold", 26 : "cloudy", 27 : "mostly cloudy (night)", 28 : "mostly cloudy (day)", 29 : "partly cloudy (night)", 30 : "partly cloudy (day)", 31 : "clear (night)", 32 : "sunny", 33 : "fair (night)", 34 : "fair (day)", 35 : "mixed rain and hail", 36 : "hot", 37 : "isolated thunderstorms", 38 : "scattered thunderstorms", 39 : "scattered thunderstorms", 40 : "scattered showers", 41 : "heavy snow", 42 : "scattered snow showers", 43 : "heavy snow", 44 : "partly cloudy", 45 : "thundershowers", 46 : "snow showers", 47 : "isolated thundershowers", 3200 : "not available" }
```

French

```
{ 0 : "tornade", 1 : "tempête tropicale", 2 : "ouragan", 3 : "grosse tempête", 4 : "orages", 5 : "pluie et neige", 6 : "pluie et neige fondue", 7 : "neige et neige fondue", 8 : "bruine verglaçante", 9 : "bruine", 10 : "pluie verglaçante", 11 : "grosses averses", 12 : "grosses averses", 13 : "averses de neige", 14 : "légères averses de neige", 15 : "bourrasques de neige", 16 : "neige", 17 : "grêle", 18 : "neige fondue", 19 : "poussière", 20 : "brumeux", 21 : "brouillard", 22 : "enfumé", 23 : "tempête", 24 : "venteux", 25 : "froid", 26 : "nuageux", 27 : "assez nuageux (nuit)", 28 : "assez nuageux (jour)", 29 : "partiellement nuageux (nuit)", 30 : "partiellement nuageux (jour)", 31 : "clair (nuit)", 32 : "ensoleillé", 33 : "beau (nuit)", 34 : "beau (jour)", 35 : "pluie et grêle", 36 : "chaud", 37 : "orages isolés", 38 : "orages éparses", 39 : "orages éparses", 40 : "averses éparses", 41 : "grosse neige", 42 : "averses de neige éparses", 43 : "grosse neige", 44 : "partiellement nuageux", 45 : "averses orageuses", 46 : "averses de neiges", 47 : "averses orageuses isolées", 3200 : "inconnu" }
```

1.9

- Fix issue related to the api change about sunrise/sunset time format

1.8

- This release needs at least Domogik 0.6.0 !
- The plugin is no more a xpl plugin : you will need **to delete the previous devices and create new ones!**
- Handle Yahoo errors
- Add forecast up to 9 days!
- Handle live devices creation
- Add Butler sentences for sunrise and sunset (fr_FR)

1.7

- This release needs at least Domogik 0.5.2 !
- Add compliance with the last butler improvment for performances
- Improve allowed sentences (fr_FR)

1.6

- Use a new datatype for visiblity : DT_kMeter (km).

- Use a new datatype for pression : DT_mbarPressure (km).
- Add a new butler interaction : fr_FR : outside temperature.
- Improve existing butler interactions : fr_FR

1.5

- Fix values since Yahoo Weather API changed in start of 2016

1.4

- Fix timeout attributes. As value could not change for a few hours, the timeout is now set to 24h on the sensors.

1.3

- Compatibility with Rivescript 1.8.1 and Domogik 0.5.0
- Improve the triggers for butler

1.2

- Butler : add dedicated butler triggers for weather
- New icon

1.1

- Fix : <https://github.com/fritz-smh/domogik-plugin-weather/issues/2>
- Fix : <https://github.com/fritz-smh/domogik-plugin-weather/issues/1>
- Fix : current temperature history is now stored

1.0

- Plugin creation
