# CHAPTER 1

---

## Course Description

---

Principles of geophysical survey design, data acquisition, processing and interpretation with emphasis on near-surface problems. Magnetic, seismic reflection/refraction, electromagnetic and ground penetrating radar surveys. Case history analysis of environmental and geotechnical problems.

- [Course syllabus](#)

**Your name and team number for TBL assignments can be found here:** [Teams 2019](#)

## CHAPTER 2

---

### Course Times

---

**Lectures:**

- Mon Wed Fri 13:00-14:00 in ESB 2012

**Labs:**

- Section L1A: Mon 15:00-17:00 in EOS Main 203
- Section L1B: Tue 13:00-15:00 in EOS Main 203

**TBL Teams:**

# CHAPTER 3

---

## Contact Information

---

### Instructors:

- Devin Cowan: [dcowan@eoas.ubc.ca](mailto:dcowan@eoas.ubc.ca), ESB 4035 then turn right

Office hours: contact the instructors via email to set up an appointment. Please include 'EOSC350' in the subject line.

### Teaching Assistants:

- Lucas Fabbri: [lucasefabbri18@gmail.com](mailto:lucasefabbri18@gmail.com)

Office hours: contact the TA's by e-mail or in person for availability. Please include 'EOSC350' in the subject line.

### Contents

## 3.1 Course Schedule

This page will be updated regularly throughout the year, check it often.

---

**Note:** Please print out the labs before attending the lab period!

---

---

**Note:** Please print out the TBL assignments before attending class!

---

**Your name and team number for TBL assignments can be found here:** [Teams 2019](#)

**The formula sheet given on the final exam can be downloaded here:** [Formula Sheet](#)

### 3.1.1 Check back soon!

The page you are looking for has not been posted yet

## 3.2 Assignments

---

**Note:** All the material is available through the course schedule.

---

---

**Note:** Please print out the labs before attending the lab period.

---

---

**Note:** Apps for the assignment are available by clicking below binder badge!

---

## 3.3 Resources

### 3.3.1 Course Resources

- GPG: Geophysics for Practicing Geoscientists
- Instructions Using UBC-JupyterHub, Syzygy, for the Course Apps
- Binder for the Course Apps

### 3.3.2 External Resources

- Physics Toolbox Magnetometer App

### 3.3.3 Jupyter Notebooks in Lab

To open and run Jupyter notebooks for lab exercises, please do the following

1. Login to the lab computer with the name and password provided
2. On the desktop, open the *Anaconda Prompt*. This command line will automatically open in the Z: folder
3. Use 'cd your-folder' to navigate to your working folder. For example: 'cd user14'. Each student has been given a folder that contains the core programming. The name of your folder is provided in the [Teams 2019](#) file.
4. Within the command line, type the command 'jupyter notebook' and press enter. This will start Jupyter notebooks in a tab within your web browser. This may take a while.
5. Navigate to the correct notebook and select. This should open another tab that starts the app. Within each app there are instructions for how to run the code.
