\$gosugamers-API is an unofficial API/Scraper for the gosugamers.net data (matches and teams for now)

Look how easy it is to use:

```
from gosu_gamers.gg_team import TeamScraper ts = TeamScraper('dota2')
ts.get_teams() [print(team) for team in ts.teams]
```

this prints out all dota2 team basic data found on <http://www.gosugamers.net/dota2/rankings> page, i.e. # 1
China NewBee 1,505 Unchanged 7763 # rank country name score position_change team_id(meta data)

CHAPTER 1

Features

- Scrapes gosugamers.net for match or team details
- Currently supports dota2, lol and hearthstone games

CHAPTER 2

Installation

Install \$gosugamers-API by running:

```
python install setup.py
```

CHAPTER 3

Contribute

- Issue Tracker: <https://github.com/Granitas/GosuGamers-API/issues>
- Source Code: <https://github.com/Granitas/GosuGamers-API>

CHAPTER 4

Support

If you are having issues, please let me know.

CHAPTER 5

License

The gosugamers-API is licensed under the BSD license.
