
Grabfeed Documentation

Release 0.3

Sudip Kafle

Jun 20, 2017

Contents

1	Getting Started with Grabfeed	3
2	Sample Code:	5
3	Tested platforms:	7

Python package to detect and return RSS feeds for a given website. It has been tested with major blogging platforms.

1. You enter a URL.
2. Grabfeed detects and returns RSS feed URL for the website.

CHAPTER 1

Getting Started with Grabfeed

Install it with pip:

```
pip install grabfeed
```

CHAPTER 2

Sample Code:

An example code to run Grabfeed and return RSS feed:

```
from grabfeed.grabber import return_rss
rss_feed = return_rss('http://techcrunch.com')
print(rss_feed)
# output: http://techcrunch.com/feed/
```

CHAPTER 3

Tested platforms:

- Wordpress, Blogger, Tumblr, Ghost, Svbtle and Medium
- Works with most of the blogs on the web even though they are not built with above platforms.
- **Support for:**
 - Python 2.6
 - Python 2.7
 - Python 3.2
 - Python 3.3
 - Python3.4
 - And even Pypy!
- 100% test coverage
