# httpasync Documentation

*Release 0.2.0*

**Erik Moqvist**

**Jun 27, 2019**

---

## Contents

---

<b>1</b>	<b>HTTP Async</b>	<b>3</b>
<b>2</b>	<b>Installation</b>	<b>5</b>
<b>3</b>	<b>Examples</b>	<b>7</b>
<b>4</b>	<b>Functions and classes</b>	<b>9</b>
	<b>Index</b>	<b>11</b>

# CHAPTER 1

---

## HTTP Async

---

Project homepage: <https://github.com/erimoq/httpasync>

Documentation: <https://httpasync.readthedocs.org/en/latest>

## CHAPTER 2

---

### Installation

---

```
pip install httpasync
```

## CHAPTER 3

---

### Examples

---

There are plenty of examples in the [examples folder](#).

---

## Functions and classes

---

```
class httpasync.Server (host, port, routes)
```

```
    serve_forever ()
```

```
        Setup a listener socket and forever serve clients. This coroutine only ends if cancelled by the user.
```

## S

`serve_forever()` (*httplib.Server method*), 9

`Server` (*class in httplib*), 9
