indico_footer Documentation

Release 2.0.1

__author__

May 30, 2018

Subtopics Overview:

1 Installation 3

2 Configuration 5

3 Changelog 7

4 Overview 9

5 Quick Guide 11

6 Contributing and Feedback 13

7 Disclaimer 15

CHAPTER 1

Installation

The plugin can be installed using standard Python package managers. To enable the plugin, it must be added to the configuration file of indico.

Note that at least `indico` 2.0 is required, and will be installed automatically if it is missing.

1.1 Installing the package

The `indico_custom_footer` plugin must be installed for the python version running `indico`. With a standard indico installation, you must activate the indico python virtual environment first.

```
su - indico
source ~/.venv/bin/activate
```

The latest release version is available for the default python package managers. You can directly install the module using `pip`:

```
pip install indico-plugin-custom-footer
```

This can also be used to upgrade to a newer version:

```
pip install indico-plugin-custom-footer --upgrade
```

1.2 Enabling the package

All plugins must be enabled in indico's configuration file. By default, the configuration is located in `/opt/indico/etc/indico.conf`.

```
PLUGINS = {'custom_footer'}
```

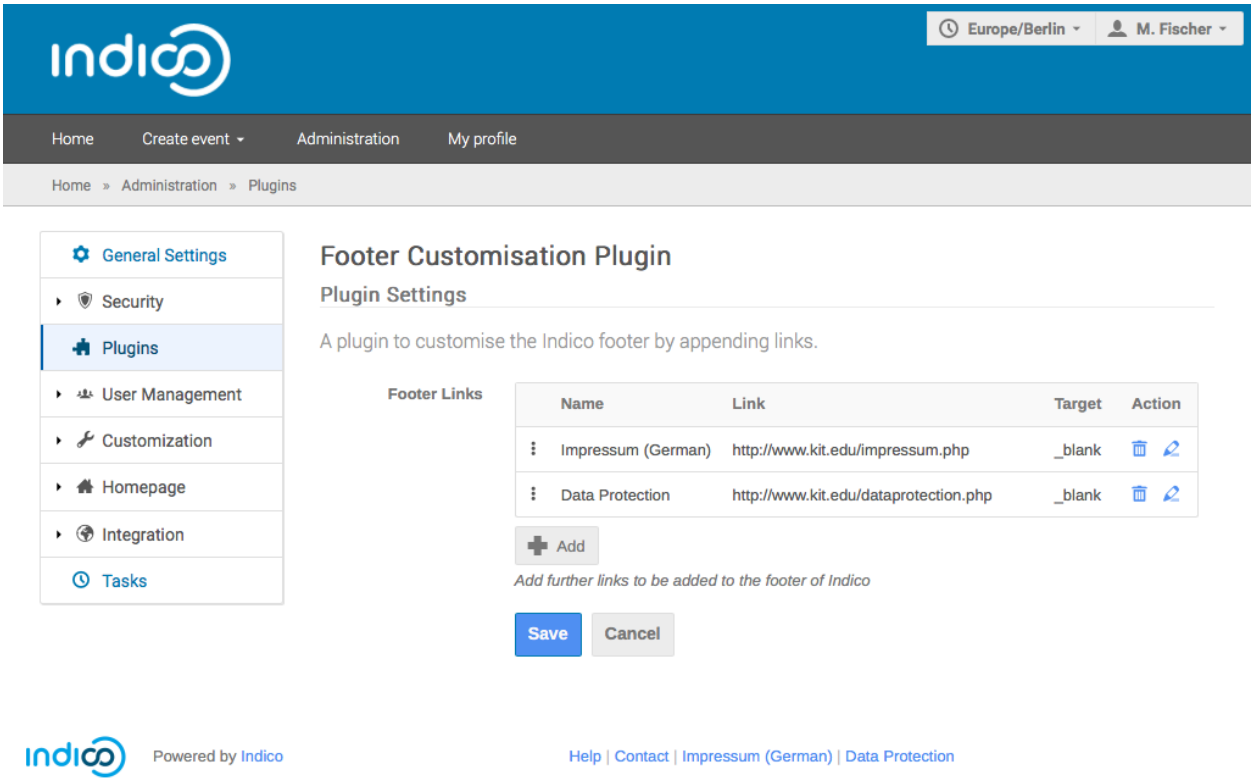
Note that if you need multiple plugins, you must include them all in the set of `PLUGINS`:

```
PLUGINS = {'payment_manual', 'payment_paypal', 'payment_sixpay', 'custom_footer'}
```

CHAPTER 2

Configuration

Once installed, the plugin can be configured from the `Administration` panel. From the main page, select `Administration` -> `Plugins` -> `Footer Customisation`.



2.1 Adding and Ordering Links

Configuration gives you access to an *ordered* list of links. To add new links, use the `+ Add` button below the list. The footer is populated with the links in the same order as in the list. You can drag and drop entries to change their ordering.

2.2 Configuring Links

Each link consists of three settings:

Name The link name as shown in the footer.

Link The address as pointed to by the link.

Target Where to open the link: `_self` for the current window/tab or `_blank` for a new window/tab.

You can configure each link separately by hitting the pencil button next to it. Note that changes to a link must stored individually by hitting the disk button. Only afterwards can changes be saved with the `Save` button.

CHAPTER 3

Changelog

3.1 v2.0.1 – 2018-05-30

- Minor documentation fixes

3.2 v2.0.0 – 2018-05-30

- Initial release version for Indico 2.0
- Renamed distribution, package and plugin to match Indico convention
- Internal optimisations

3.3 v1.0.0 – 2018-05-29

- Initial test version for Indico 2.0

The `indico_custom_footer` allows you to add custom links to the Indico footer.

CHAPTER 4

Overview

If the plugin is enabled, administrators can add additional links to the Indico footer. For example, in addition to the `Terms and conditions` you can now add a `legal disclaimers` link to your organization's disclaimers.

Once *installed*, the administrator panel allows adding new footer links. Each link consists of the following settings:

Name The link name as shown in the footer.

Link The address as pointed to by the link.

Target Where to open the link: `_self` for the current window or `_blank` for a new window/tab.

CHAPTER 5

Quick Guide

To enable the plugin, it must be installed for the python version running `indico`.

```
python -m pip install indico-plugin-custom-footer
```

Once installed, the plugin called `custom_footer` can be enabled in the Indico configuration. New footer elements can be added by configuring the plugin in the administrator settings.

CHAPTER 6

Contributing and Feedback

The project is hosted on github. Feedback, pull requests and other contributions are always welcome. If you have issues or suggestions, check the issue tracker:

CHAPTER 7
