| 7.2 | Taxonomy | 44 |

This is documentation of technical issues relevant for developers and administrators of the IPBES website.

CHAPTER 1

Major components

The IPBES website is based on DKAN, a [Drupal Distribution](#). Additional modules have been added to extend functionality. Modules are added from contributed modules available from the Drupal Community [contrib modules](#) from the Drupal community.

DKAN consists of of a distribution profile which manages the initial installation, 3rd party libraries and drupal modules, and DKAN specific modules. Below is a simplified version of where the DKAN code sits within the code:

```
profiles/  
  dkan/  
    libraries/ (3rd party libraries)  
    modules/  
      dkan/ (dkan modules)  
      contrib/ (3rd party module dependencies)  
      themes/ (dkan themes)
```

1.1 Menu

Used for navigation

1.1.1 Administrative menu

1.1.2 Main menu

Main menu:

```
www.ipbes.net/  
  About/  
    Members and Observers  
    Observer organisations  
    National Focal Points
```

1.1.3 User menu

User menu:

```
www.ipbes.net/
  My account/ (dashboard with user account, profile, form submissions, roles)
  Messages (private messages sent to and by user)
  Log out
```

1.1.4 Policy support menu

Policy support tools and instruments

Note: The policy support catalogue structure is maintained by WCMC and OPPLA and changes to the menu structure needs to be done in consultation with them.

1.2 Content types

A Content Type is a set of fields for a particular type of data. Content types contain a field for the node title and second field for the body into which the node content is placed. The title and body fields display information to the user. Additional fields for a node store url and redirect settings. IPBES has the following content types:

Content Types and node count for each on 28 February 2019

| Content Type | Count |
|---|-------|
| Accredited organisations | 385 |
| Administration profile | 5055 |
| Assessment | 7 |
| Assessment IPBES | 8 |
| Capacity building opportunities and resources | 5 |

1.4 Modules

A Drupal module is a collection of files containing some functionality and is written in PHP. The modules and themes should not be updated or changed within the Drupal Core and DKAN folder (profiles/dkan).

1.4.1 Core modules

| module | machine |
|---------------------|-------------|
| Aggregator | aggregator |
| Block | block |
| Blog | blog |
| Book | book |
| Color | color |
| Comment | comment |
| Contact | contact |
| Content translation | translation |
| Contextual links | contextual |
| Dashboard | dashboard |
| Database logging | dblog |
| Field UI | field_ui |
| Field | field |
| File | file |
| Filter | filter |
| Forum | forum |
| Help | help |
| Image | image |
| Locale | locale |
| Menu | menu |
| Node | node |
| OpenID | openid |
| Overlay | overlay |
| Path | path |
| PHP filter | php |

| Visualization Entity | visualization_entity | |
| Workbench Email | workbench_email | 7.x-3.12 |
| Workbench Moderation | workbench_moderation | 7.x-3.0 |
| Workbench | workbench | 7.x-1.2 |

1.4.3 Additional modules

Additional modules added by IPBES to extend the functionality of Drupal and DKAN. All customizations, updates and patches of Drupal Core and DKAN modules need to be done within sites/all/.. directory.

```
sites/
  all/
    libraries/ (your libraries)
    modules/ (your modules)
      contrib/ (modules from Drupal)
      custom/ (custom modules)
    themes/ (your themes)
```

(*) Replaces version in DKAN and needs to be checked after pulling DKAN upstream code

The following modules have been patched:

- Quote

The following modules have been uninstalled:

- Honeypot (added to DKAN package)
- Harmony_core, harmony_access, harmony_access_og, harmony_default_permissions, harmony_forum_access, harmony_moderation, harmony_Search (replaced with Advanced Forum)

| module | machine | version | version8 | Used by |
|------------------------------|-----------------------------|----------------|-------------------|---------------------|

1.4.4 Custom modules

List of modules that have been custom made or patched

| module | machine | version | deactivated |
|------------------|------------------|---------|-------------|
| Custom Functions | custom_functions | | FALSE |

1.5 Themes

Themes control the design, look and feel of the website using HTML, CSS, JavaScript, and other front-end assets in order to implement a design for their site. Themes are used to change the HTML markup of anything in Drupal; Add CSS styles to change the layout, color, or typography on one or more pages; and Use JavaScript to enhance the user experience

The theme used is based on Radix which comes packaged with DKAN. Customisations have been done and a new theme (ipbes_new) has been built. The theme uses [Gulp](#) to compile Sass and check for errors in CSS. Gulp needs Node. This approach minifies the code to make it load fast while simplifying maintenance.

1.5.1 Installation of theme

1) Make sure you have Node and npm installed. You can read a guide on how to install node here: <https://docs.npmjs.com/getting-started/installing-node> If you prefer to use [Yarn](#) instead of npm, install Yarn by following the guide here: <https://yarnpkg.com/docs/install>.

2. Install bower:

```
npm install -g bower
```

3. Clone the git repository for the webstyles to be next to your project folder:

```
git clone https://github.com/ipbes/webstyles.git
```

4. Go to the root of *ipbes_new* theme and run the following commands:

```
npm run setup  
  
To install using Yarn, run::  
  
yarn install && bower install
```

5) Configure the destination folder. This is only the source code for the theme and the generated assets need to be copied to the pantheon repository in the *sites/all/themes* folder:

```
export DIST=<pantheon_repo>/sites/all/themes
```

6. Run gulp to copy the minified styles to the project directory:

```
gulp dist
```

1.5.2 Style guide

Header Text **Helvetica Neue 75 Roman**

Body Text Helvetica Neue 45 Light (Body Text)

Primary colours

- Grey: #676b5e
- **Teal: #0a8380**
 - Teal 50%: #84c2c1
 - Teal 33%: #aed6d6
 - Teal 25%: #c2e0e0
- Green: #a5ae60
- Blue: #002e5e

Secondary colours

- Greyish green: #81857a
- Purple: #562974
- Orange: #d6490c

Check the colours here: <http://www.color-hex.com/color/81857a>

CHAPTER 2

Installation

The code for the site is based on DKAN. The code is hosted on pantheon.io and available only to invited members.

Maintaining the website

Keeping the website up to date improves performance by fixing bugs.

3.1 Modules

- Keep modules up to date. This fixes security issues and fixes bugs
- Reduce number of modules i.e. try to keep only key modules and remove those that perform a single task that can be done by a different design

3.2 Views

- Views can give negative impact in your site performance because of complex join queries.
- Enable views caching on pages or blocks that don't need to be updated in real time.
- Simplify views e.g. by improving content type structures.
- Remove utf8_decode from data export because it significantly slows down exports.

3.3 Errors

- Resolve error logs. Pantheon provides developers direct access to numerous resources for debugging site execution problems, including slow site performance and PHP errors.
- Debugging sites with log files, including how to retrieve them → <https://pantheon.io/docs/logs/>
- Debugging slow performance → <https://pantheon.io/docs/debug-slow-performance/>
- PHP errors and exceptions → <https://pantheon.io/docs/php-errors/>
- Pantheon server errors and responses → <https://pantheon.io/docs/errors-and-server-responses/>

- New Relic → profiles and tracks application performance over time – <https://pantheon.io/docs/new-relic-analysis/>
- Perform site audit: <https://pantheon.io/docs/drupal-launch-check/#troubleshooting>

3.4 Database design

- Make sure all tables are in InnoDB format and not MyISAM: <https://pantheon.io/docs/myisam-to-innodb/>
- Keep PHP version up to date: <https://www.pantheon.io/docs/php-versions/>
- Database 4 byte UTF-8 support: <https://www.drupal.org/node/2754539>

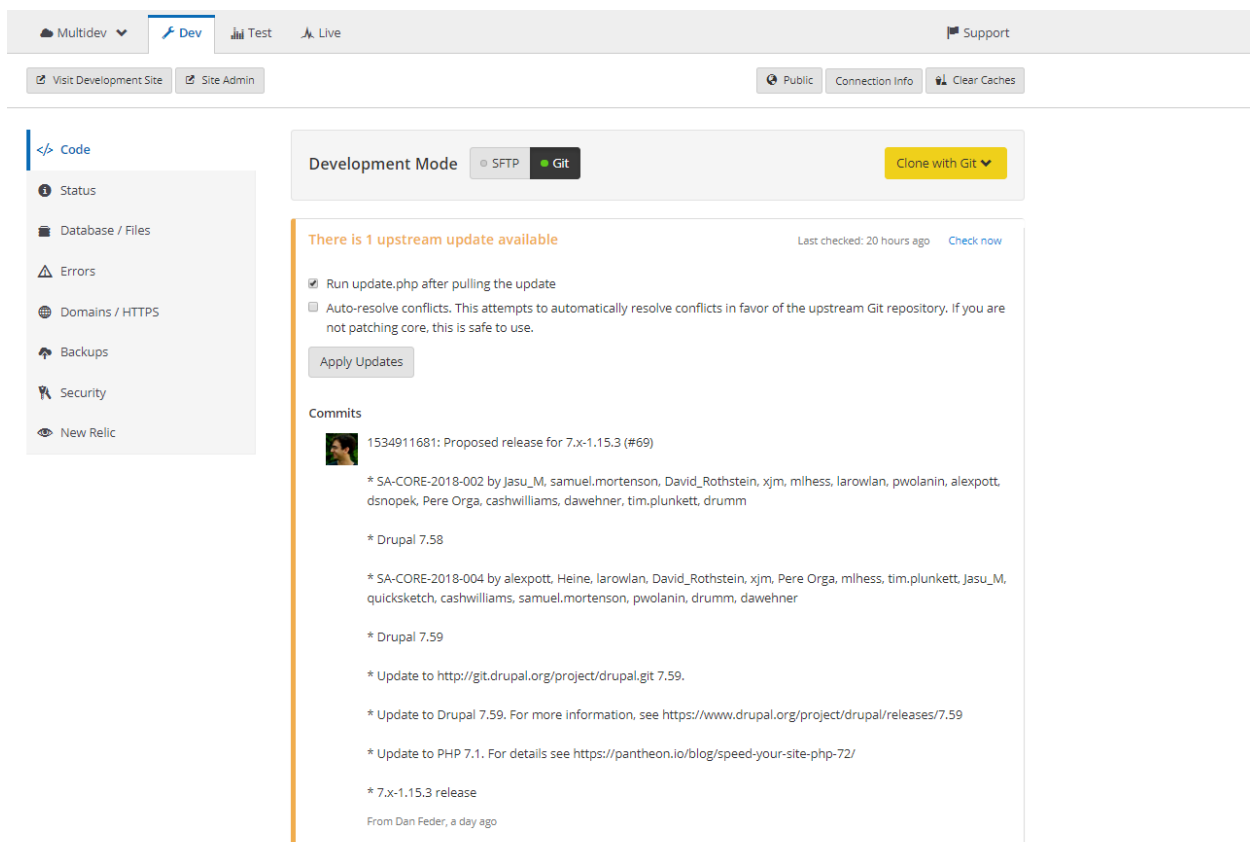

3.4.1 Drupal core updates

Drupal core updates are taken care of by the DKAN package. See Pantheon updates below

3.4.2 Pantheon updates

You can apply upstream Drupal or DKAN updates via the Site Dashboard on Pantheon as follows:

1. Navigate to the Code tab in the Site Dashboard on the Dev environment to check available updates:

The screenshot shows the Pantheon Site Dashboard for the Dev environment. The top navigation bar includes tabs for Multidev, Dev (selected), Test, and Live, along with a Support link. Below the navigation bar are links for Visit Development Site, Site Admin, Public, Connection Info, and Clear Caches. The main content area is divided into a left sidebar with links for Code, Status, Database / Files, Errors, Domains / HTTPS, Backups, Security, and New Relic. The central panel shows the Development Mode (SFTP and Git) and a notification that there is 1 upstream update available. The notification includes a 'Check now' link and a 'Clone with Git' button. Below the notification, there are checkboxes for 'Run update.php after pulling the update' (checked) and 'Auto-resolve conflicts' (unchecked). An 'Apply Updates' button is present. The 'Commits' section lists several commits, including a proposed release for 7.x-1.15.3 (#69) and updates to Drupal 7.58, 7.59, and PHP 7.1.

2. If you have SFTP changes you want to commit and deploy, do so now. Then set the site's connection mode to Git.

3. Select whether you want to automatically resolve conflicts. Drupal users can opt to run `update.php` after updates are applied.
4. Click Apply Updates.
5. Click Visit Development Site in the Development Environment to test and QA the site.
6. Follow the standard Pantheon Workflow to deploy changes up to Test and on to Live.

3.4.3 Review, update and uninstall modules using drush

It is better to use drush instead of git because drush will check to see dependencies of the module before uninstalling and prompt you to uninstall/check dependent modules.

Requirements

- A mac computer with terminal
- drush <http://docs.drush.org/en/master/install/>
- drush aliases from your user dashboard: <https://pantheon.io/blog/drush-aliases-available>
- Machine name of module which is the name of the module folder in `sites/all/modules/contrib`

Preparation

- Disable module on live
- Clone live environment to dev
- Make sure that the module is contained in `sites/all/modules/contrib` and that you are not uninstalling a module that comes with the site distribution package
- Do a manual backup of site

Steps for updating

- check for modules that need to be updated on drupal: `/admin/modules/update`
- Log into Pantheon and go to the dev environment
- Switch development mode from git to SFTP
- Go to terminal on Mac and change directory to the project folder e.g. `cd ipbesnew`
- Type in the following command: `drush @pantheon.ipbesnew.dev up [machine name of module]`
- Confirm that you wish to update the module
- Go back to the pantheon dashboard and add a commit message
- Test to see that the site is working fine on the DEV environment
- Pull code upstream to live
- Switch site back to git mode

Steps for uninstalling

- Back up any view or page that is using the module
- Make sure that no view or page is using the module
- Log into Pantheon and go to the dev environment
- Switch development mode from git to SFTP
- Go to terminal on Mac and change directory to the project folder e.g. `cd ipbesnew`
- Type in the following command: `drush @pantheon.ipbesnew.dev pmu [machine name of module]`
- Confirm that you wish to disable the module
- Go back to the pantheon dashboard and add a commit message
- Switch site back to git mode

3.4.4 Check views

An archive of views used on the IPBES website is made available here: <https://github.com/ipbes/ipbeswebdocs/tree/master/docs/views>

- Cache views: Turn on caching for blocks and pages created using the Views module. This allows you to cache the output of the query used to generate the view, or the end HTML output of your View, and you can tune the cache for them separately
- Simplify view design
- Regularly check views for breakages especially after uninstalling modules

3.4.5 Check rules

Export and disable rules that are not in use

4.1 Content management

We currently have the following content types/**Nodes**. There are **two ways** of creating content through the administrative profile on the [website](#)

1. My Workbench>Create content: <https://www.ipbes.net/admin/workbench/create>
2. Content> Add content: <https://www.ipbes.net/node/add>

4.2 Taxonomy/Vocabulary management

Taxonomies are mainly used to categorize content and the terms are grouped into vocabularies. New taxonomy/vocabulary can be created through the following two administrative options:

1. **Taxonomy**

Structure> Taxonomy> Add vocabulary: <https://www.ipbes.net/admin/structure/taxonomy>

2. **Taxonomy Manager**

Structure> Taxonomy Manager: https://www.ipbes.net/admin/structure/taxonomy_manager/voc. The Taxonomy Manager allows mass adding of new terms, mass deletion, simple search interface, dynamic trees etc.

4.3 File management

Uploaded files can be managed centrally from

Content>Files: <https://www.ipbes.net/admin/content/file>

Meeting documents are managed from the Document Management administration menu item: <https://www.ipbes.net/admin/documents/list>

4.4 Form management

There are two different ways to build forms on the IPBES website. Entity forms and Webforms.

4.4.1 Webforms

Useful for performing surveys. It is well established and has a number of modules that integrate with it such as multiple file upload. It inherits node functionality like scheduled publishing, cloning, access control and conditional fields. It also offers a page where you can get a quick overview of results and options for downloading submissions. It also has an inbuilt notification system. The disadvantage of using webforms is that you cannot use existing fields as entities and rendering forms using views is more difficult (not impossible).

Webforms can be accessed under the Content tab in the administration menu: `/admin/content/webform`

4.4.2 Entity forms

Entityforms can make a wide variety of forms with lots of different fields available. Entityforms uses the entity API which guarantees it will work with Views, Rules, Entity Reference, Organic Groups and all Drupal fields. This makes it possible to look up existing content and vocabularies and render forms differently. Entity form also offers functionality like conditional fields and field groupings.

Entityforms can be accessed under the Structure tab in the administration menu: `admin/structure/entityform_types`

4.5 Permissions and access control

4.5.1 Roles/User groups

The roles used to set different permissions are found under People on the administration menu: `/admin/people/permissions/roles`

We currently have the following roles: administrator; anonymous user (locked); authenticated user (locked); bureau; content creator; editor; experts; fod 2b africa; fod 2b americas; fod 2b asia pacific; fod 2b europe central asia; FOD 2c Global; fod 3bi land degradation; forum moderator; html editor; ipbes admin; media; mep; national focal points; plenary; pstm moderator; pstm review; role test; secretariat; site manager; sod 2b africa; sod 2b americas; sod 2b asia pacific; sod 2b europe central asia; sod 2c Global; sod 3bi land degradation

4.5.2 Permissions

Permission settings can be found under People on the administration menu: `/admin/people/permissions`

4.5.3 Access control

Permissions to view specific pages are determined using website Roles and the access field in conjunction with with Taxonomy Access Control module (tac_lite).

Content creators have to select access levels from the following options which are stored in the [Access](#) taxonomy vocabulary: 2c global; 3bi Land degradation; Bureau; Indicators_temp; IPBES5; Media; MEP; National Focal Point; Plenary; pstm review; Public; Registered; Secretariat; Super User

Settings for access control can be found when you click on “Configuration” in the administration menu: Configuration > Access by Taxonomy > View : https://www.ipbes.net/admin/config/people/tac_lite/scheme_1

There are several ways you can get involved with developing the IPBES website e.g. ask a question, suggest improvements you would like to see.

5.1 Submit code

For developers who would like to suggest theme/appearance changes

- Pull requests for [theme](#) Add a link to the issue it fixes and a detailed description about your fix.
- Pull requests for [views](#) Submit a view export and a detailed description about your fix.

5.2 Connect

- Follow @ipbes on [Twitter](#)

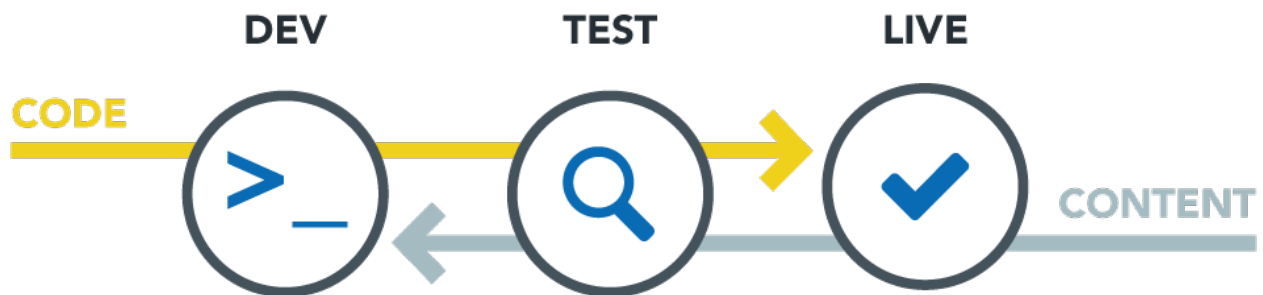

Web and domain name hosting

6.1 Web hosting

The IPBES website is hosted on [Pantheon](#). The advantages of this are:

- Git workflow
- Daily backup
- Staging environments
- Support

The Pantheon workflow requires code to be committed to dev and pulled up to <test> and <live> environments. Database changes and pull down from <live> to <dev>

6.2 Domain name hosting

The domain name services (DNS) are hosted by [gandi.net](#)

7.1 Nodes

7.1.1 Accredited Organizations

List of organizations that have been accredited by the Plenary to attend its sessions

7.1.22 Harvest Source

| FieldName | Machinename | Type |
|--------------|---------------------------------|------------------------------|
| Defaults | field_dkan_harvest_defaults | Double field |
| Description | body | Long text and summary |
| Excludes | field_dkan_harvest_excludes | Double field |
| Filters | field_dkan_harvest_filters | Double field |
| Machine Name | field_dkan_harvest_machine_name | Machine name from node title |
| Overrides | field_dkan_harvest_overrides | Double field |
| Source URI | field_dkan_harvest_source_uri | Text |
| Title | title | Node module element |
| Type | field_dkan_harveset_type | List (text) |

7.1.23 In Session Documents

| FieldName | Machinename | Type |
|-----------|----------------|-----------------------|
| Body | body | Long text and summary |
| Sections | field_sections | Paragraphs |
| Title | title | Node module element |

7.1.24 Indicators

| FieldName | Machinename | Type |
|------------------------|----------------------------------|-----------------------|
| Aichi Target | field_field_aichi_target_sdg | Term reference |
| BIP | field_ind_bip | Text |
| Body | body | Long text and summary |
| CF | field_cf | Term reference |
| Chapter(s) | field_ind_chapter | Term reference |
| Contact | field_ind_contact | Text |
| Data file | field_ind_data_file | File |
| DPSIR | field_dpsir | Term reference |
| Factsheet file | field_ind_factsheet_file | File |
| Image files | field_ind_image_files | File |
| Indicator type | field_ind_category | Term reference |
| IndicatorID | field_indicatorid | Integer |
| Metadata | field_ind_metadata | Link |
| MetadataTag | field_ind_metadatatag | Text |
| Origin | field_ind_origin | Text |
| Source | field_ind_source | Text |
| Specific Indicator | field_specific_indicator | Text |
| Title | title | Node module element |
| Visual storylines file | field_ind_visual_storylines_file | File |
| Visual_file | field_ind_visual_file | File |

7.1.25 Capacity building opportunities and resources

Use: Policy support portal

Maintained by: UNEP-WCMC, TSU Capacity Building

| FieldName | Machinename | Type |
|--|----------------------------------|----------------------------|
| Case studies | field_case_studies_eva | Entity Reference |
| Contact Name | field_contact_name | Text |
| Curriculum/Agenda | field_curriculum_agenda | Long text |
| Date (if applicable) | field_date | Date |
| Email | field_email | Email |
| Images | field_images | Image |
| Issues covered by global targets and IPBES deliverables | field_issues | Term reference |
| Language | field_library_document_language | Term reference |
| Capacity-building opportunity or resource type | field_training_type | Term reference |
| Logo | field_logo | Image |
| Other languages | field_other_languages | Long text |
| Phone number | field_phone_number | Text |
| Policy support type | field_policy_support_type | List (float) |
| Price | field_price | Decimal |
| Requirements | field_requirements | Long text |
| Summary of the capacity-building opportunity or resource | body | Long text and summary |
| Title | title | Node module element |
| Policy instruments and policy support tools | field_tools_and_instruments_eva | Entity Reference |
| Upload | field_existing_file | File |
| Video embed | field_video_embed | Video Embed |
| Website | field_website | Link |
| Workbench Access | workbench_access | Workbench Access settings. |
| Related Aichi Biodiversity Targets | field_aichi_biodiversity_targets | Term reference |
| Related Sustainable Development Goals (SDGs) | field_related_sdg | Term reference |
| Countries | field_country | Term reference |
| Sub/region covered | field_sub_region | Term reference |
| Assessments | field_assessments | Entity Reference |

7.1.26 Media Watch

| FieldName | Machinename | Type |
|---------------------|---------------------------|-----------------------|
| Body | body | Long text and summary |
| Date of Publication | field_date_of_publication | Date |
| Media Country | field_media_country | Text |
| Media Source | field_media_source | Link |
| Media Title | field_media_title | Text |
| Title | title | Node module element |

7.1.27 Methodological Guidance

Use: Policy support portal

Maintained by: UNEP-WCMC, TSU Values, TSU Scenarios

| FieldName | Machinename | Type |
|-----------------------|---------------------------------|-----------------------|
| Access control | field_access_control | Term reference |
| Body | body | Long text and summary |
| Methodology type | field_methodology_type | List (text) |
| Tools and instruments | field_tools_and_instruments_eva | Entity Reference |

7.1.28 News

| FieldName | Machinename | Type |
|-----------------|--------------------|-----------------------|
| Body | body | Long text and summary |
| Groups audience | og_group_ref | Entity Reference |
| Image | field_image | Image |
| Old NId | field_old_nid | Integer |
| Sections | field_sections | Paragraphs |
| Tags | field_tags | Term reference |
| Title | title | Node module element |
| Type | field_type_article | Term reference |

7.1.29 Nomination Calls

| FieldName | Machinename | Type |
|--------------------------|-----------------------|-----------------------|
| Body | body | Long text and summary |
| Dates | field_date | Date |
| Deactivate | field_deactivate | Boolean |
| Deliverable(s)/Body(ies) | field_deliverables | Term reference |
| Nomination type | field_nomination_type | List (text) |
| Title | title | Node module element |

7.1.30 Notifications

| FieldName | Machinename | Type |
|-------------------------|---------------------------|-----------------------|
| Announcement Number | field_announcement_number | Text |
| Application Link | field_application_link | link |
| Application period | field_application_period | date |
| Body | body | Long text and summary |
| Deliverable(s)/Category | field_deliverable | Term reference |
| Description file | field_vacancy_description | file |
| File | field_file | File |
| Job Level | field_job_level | Term reference |
| Job title | field_job_title | Text |
| Link API | field_link_api | Link |
| Link File | field_link_remote_file | File |
| Notification type | field_notification_type | Boolean |
| Title | title | Node module element |
| Vacancy type | field_vacancy_type | boolean |

7.1.31 Page

| FieldName | Machinename | Type |
|--------------------------|----------------------|-----------------------|
| Access control | field_access_control | Term reference |
| Body | body | Long text and summary |
| Deliverable(s)/Body(ies) | field_deliverables | Term reference |
| Sections | field_sections | Paragraphs |
| Title | title | Node module element |

7.1.32 Post

| FieldName | Machinename | Type |
|-----------|-------------|---------------------|
| Title | title | Node module element |

7.1.33 Resource

| FieldName | Machinename | Type |
|--------------------------|--------------------------|----------------------------|
| Dataset | field_dataset_ref | Entity Reference |
| Datastore Status | field_datastore_status | Hidden integer |
| Description | body | Long text and summary |
| Existing File | field_existing_file_only | File |
| Feed | feeds | Feeds module form elements |
| Format | field_format | Term reference |
| Group content visibility | group_content_access | List (integer) |
| Groups audience | og_group_ref | Entity Reference |
| Link API | field_link_api | Link |
| Link File | field_link_remote_file | File |
| Orphan | field_orphan | Boolean |
| Resource type | field_resource_type | List (text) |
| Sections | field_sections | Paragraphs |
| Title | title | Node module element |
| Upload | field_upload | Recline.js vizualization |
| Video embed | field_video_embed | Video Embed |

7.1.34 Role

| FieldName | Machinename | Type |
|--------------------|-----------------------------|-----------------------|
| Application date | field_application_date | Date |
| Application number | field_application_number | Text |
| Assessment Region | field_region_assessment | Term reference |
| assessmentregion | field_assessment_region | Term reference |
| Body | body | Long text and summary |
| Chapter | field_chapter | Term reference |
| Decision | field_decision | Term reference |
| Deliverable | field_deliverable | Term reference |
| ExpertID | field_expertid | Integer |
| Full Name | field_full_name | Text |
| Government | field_government | Entity Reference |
| IPBES ID | field_ipbes_id | Integer |
| Justification | field_justification | Long text |
| Nomination call | field_nomination_call | Term reference |
| Nomination date | field_nomination_date | Date |
| Nomination number | field_nomination_number | Text |
| nominator | field_nominator | boolean |
| Nominator type | field_nominator_type | List (text) |
| Organisation | field_organisation | Term reference |
| Role | field_role_eva | Entity Reference |
| round | field_round | text |
| Search Users | field_search_users_accounts | Entity Reference |
| Secretariat | field_secretariat | Term reference |
| Status | field_status | boolean |
| thematicassessment | field_thematic_assessment | Term reference |
| Title | title | Node module element |

7.1.35 Slideshow

| FieldName | Machinename | Type |
|----------------|----------------------|-----------------------|
| Body | body | Long text and summary |
| Call to Action | field_call_to_action | Link |
| Headline | field_headline | Text |
| Slide image | field_slide_image | Image |
| Title | title | Node module element |

7.1.36 Supporting Material

| FieldName | Machinename | Type |
|---------------------------|---------------------------------|---------------------|
| Caption | field_caption_body | Text |
| Deliverable | field_deliverable | Term reference |
| File | field_existing_file | File |
| Format | field_format | Term reference |
| Language | field_library_document_language | Term reference |
| Supporting material title | field_supporting_material_title | Term reference |
| Title | title | Node module element |

7.1.37 Tools Instruments

Use: Policy support portal

Maintained by: UNEP-WCMC

| FieldName | Machinename | Type |
|---|----------------------------------|-----------------------|
| Advantages | field_advantages | Text |
| Aim of the resource | field_resource_purpose | Long text |
| Assessment of effectiveness of the product/item | field_pstm_assessment | Long text |
| Author | field_author | Text |
| Category of policy instruments | field_category_policy_instrument | Term reference |
