Release 0.2.0

Baptiste Fontaine

October 26, 2017

1	Install	3
2	Guide	5
2.1	API Reference	5
2.2	Changes	5
	Python Module Index	7

jinja2_maps is a set of Jinja2 filters for embed maps and location URLs.

Install

With `pip`:

```
[sudo] pip install jinja2_maps
```

API Reference

jinja2_maps

`jinja2_maps.activate_filters(env)`

Activate all filters on a given environment. If using Flask calling `activate_filters(app.jinja_env)` at the top of your `app.py` should be sufficient.

Changes

v0.3.0 (upcoming version)

- URL filters added for ArcGIS, Yandex Maps, HERE Maps, and Wikimapia
- `google_maps_url` alias added for `gmaps_url`

v0.2.0 (2016/03/23)

- URL filters added for Apple Maps, Bing Maps, and Mappy
- URL filter crash when the `zoom` is not provided fixed

v0.1.1 (2016/03/19)

Bugfixes.

v0.1.0 (2016/03/18)

Initial release.
