
jsondiff Documentation

Release 0.1.0

Eric Reynolds

May 31, 2018

Contents

1	Basic Use	3
1.1	Installation	3
2	Indices and tables	5

jsondiff is an MIT-licensed Python library which lets you compare, diff and patch JSON and JSON-like structures in Python. It has special support for

- multiple and custom-defined diff syntaxes
- Python sets
- similarity-based list comparison

Note: jsondiff is currently in an early stage. The API might change in backward incompatible ways.

Contents:

1.1 Installation

The first step is to install `jsdiff`, if you haven't already

```
pip install jsdiff
```

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
