Arithmetic

Assuming you already mastered hiragana or katakana, you can derive its japanese character equivalent based on its romanized counterpart (romaji).

Bullet format will be as follows:

- Romaji
- Syllable Pronunciation
- Hiragana/Katakana

Notice:

- The “chi” syllable in romaji is the same as “ti” in hiragana.
- The “shi” syllable in romaji is the same as “si” in hiragana.
