CHAPTER 2

Installation

- First step, please download the new version of Lulubox first.

- After downloading, now install on your Android as usual. Don't forget to allow installation from external source. If it is blocked by Android Security, please enter Settings / Security / Check on unknown source. Valid for Android 4.4+ users.

- After you successfully install, then open lulubox and it will appear the home screen of the app.

- Select the game that you want to try as an experiment to try some of the latest free skins and please download the plugins like the image below wait until it works, then select 'LAUCH GAME or PLAY'.

- Done.
