Onix Documentation

Release v0.1.2+4.g32e3706.dirty

Gili "Antar" Barlev

February 04, 2017

Contents

1 Indices and tables 3

Onix is a data mining package designed to process Pokemon Showdown battle logs for Smogon University.

It is intended to be stable, robust, easy to maintain and able to support a wide variety of in-depth analyses. If you're interested in contributing, please check out our GitHub repository] or contact Antar through the Smogon forums.

If you're interested in deploying Onix on your own Showdown server contact Antar for installation help and usage examples, but be aware that Onix is under active development.
