
Onix Documentation

Release v0.1.2+3.gd76037a.dirty

Gili "Antar" Barlev

February 04, 2017

1	Indices and tables	3
----------	---------------------------	----------

Onix is a data mining package designed to process [Pokemon Showdown](#) battle logs for [Smogon University](#).

It is intended to be stable, robust, easy to maintain and able to support a wide variety of in-depth analyses. If you're interested in contributing, please check out our [GitHub repository](#) or contact Antar through the [Smogon forums](#).

If you're interested in deploying Onix on your own Showdown server contact [Antar](#) for installation help and usage examples, but be aware that Onix is under active development.

Indices and tables

- `genindex`
- `modindex`
- `search`
