**1 Indices and tables**

**3**

OpenRCV is an open source software project for tallying ranked-choice voting elections like instant runoff voting and the single transferable vote.

OpenRCV can be used as a command-line tool or as a Python library.

It is distributed for free on [PyPI](#) and the source code is hosted on [GitHub](#). It is licensed under a permissive open source license. See the [\[License\]\(#license\)](#) section for license details.
