## 5.1 Changelog

This changelog collects all user-facing changes to project-novis. For a complete changelog see `CHANGELOG.md` in our git repository or use `git log`.

### 5.1.1 May 2019

- Add API token view in user settings
- Allow adding callsigns to your amateur radio club
- Add button to create club/repeater information to callsign page
- Optimize server configuration to reduce latency

### 5.1.2 April 2019

- Add callsign issued date to callsign page
- Disable D-STAR import as data seems inaccurate
- Add png favicon for Chrome
- Add club information box to callsign page
- Allow basic edits to club information
- Add repeater information box to callsign page

- Allow basic edits to repeater information
- Add display name field to user accounts, should be shown on callsign page in the future.
- Use HTTPS links in account mails
- Add location hint to callsign page (e.g. “Location is based on prefix and may be inaccurate.”)

### **5.1.3 March 2019**

- Improve site accessibility
- Integrate our new logo :)
- Add DXWatch profile URL
- Remove username field
- Add more RF modes
- Add REFERRER\_POLICY HTTP header
- Add link to documentation

### **5.1.4 February 2019**

- Show claim button on callsign page even if not logged in
- Add address and social media fields to user account
- Add basic callsign search

### **5.1.5 January 2019**

- Add “official issued” flag to callsign page
- Use custom form in callsign update view for HTML5 date picker widget

### **5.1.6 December 2018**

- project novis released!

## **5.2 API**

It’s awesome!

## **5.3 OAuth**
